Celeste Parrish and Educational Reform in the Progressive-Era South Rebecca S. Montgomery,2018-12-05 Celeste Parrish and Educational Reform in the Progressive-Era South follows a Civil War orphan's transformation from a Southside Virginia public school teacher to a nationally known progressive educator and feminist. In this vital intellectual biography, Rebecca S. Montgomery places feminism and gender at the center of her analysis and offers a new look at the postbellum movement for southern educational reform through the life of Celeste Parrish. Because Parrish's life coincided with critical years in the destruction and reconstruction of the southern social order, her biography provides unique opportunities to explore the links between southern nationalism, reactionary racism, and gender discrimination. Parrish's pursuit of higher education and a professional career pitted her against male opponents of coeducation who regarded female and black dependency as central to southern regional distinctiveness. When coupled with women's lack of formal political power, this resistance to gender equality discouraged progress and lowered the quality of public education throughout the South. The marginalization of women within the reform movement, headed by the Conference for Education in the South, further limited women's contributions to regional change. Although men welcomed female participation in grassroots organization, much of women's work was segregated in female networks and received less public acknowledgement than the reform work conducted by men. Despite receiving little credit for their accomplishments, by working on the margins, women were able to use the southern movement and its philanthropic sponsors as alternate sources of influence and power. By exploring the consequences of gender discrimination for both educational reform and the influence of southern progressivism, Rebecca S. Montgomery contributes a nuanced understanding of how interlocking hierarchies of power structured opportunity and influenced the shape of reform in the U.S. South.

Teachable Moments and the Science of Education Greg Seals, 2018-08-06 This book develops a general theory of autonomous teaching by examining a mysterious educational idea: the teachable moment. By formulating an understanding of the teachable moment as predicated upon 'educational energy,' this book takes up John Dewey's view of teaching to articulate a law-like, scientifically oriented pedagogical theory. By offering a testable hypothesis about effective teaching through an innovative reading of Dewey's law, this book also provides insights into changes in school practice and schooling policy consonant with an understanding of teaching as a science.

Islam as Education Aaron J. Ghiloni, 2019-08-01 Motivated by the intellectual historian Shahab Ahmed's observation that "the history of Islamic paideia has yet to be written," *Islam as Education* explores multiple forms that the search for knowledge and the transmission of wisdom have taken in Islam, focusing on the classical period (800-1500 CE). Ghiloni draws on a wide range of Islamic primary source material, ranging from sacred texts and parables to neglected pedagogical literature and paintings. He depicts three Islamic religious practices—pilgrimage, prophecy, and jihad—as modes of pedagogy: embodied ways of defining, defusing, and defending sacred knowledge. *Islam as Education's* educational heuristic not only aids in understanding Islam, but also provides guidance for intercultural and interreligious relations. Ghiloni argues that Islam's grand (knowledge) tradition serves as a bridge between Muslims and non-Muslims, and compares it with the educational theory of John Dewey, the celebrated American pragmatist. Based on this discussion, a final chapter develops practical tools for learning from cultural and religious difference.

Experience And Education John Dewey, 2007-11-01 *Experience and Education* is the best concise statement on education ever published by John Dewey, the man acknowledged to be the pre-eminent educational theorist of the twentieth century. Written more than two decades after *Democracy and Education* (Dewey's most comprehensive statement of his position in educational philosophy), this book demonstrates how Dewey reformulated his ideas as a result of his intervening experience with the progressive schools and in the light of the criticisms his theories had received. Analyzing both traditional and progressive education, Dr. Dewey here insists that neither the old nor the new education is adequate and that each is miseducative because neither of them applies the principles of a carefully developed philosophy of experience. Many pages of this volume illustrate Dr. Dewey's ideas for a philosophy of experience and its relation to education. He particularly urges that all teachers and educators looking for a new movement in education should think in terms of the deeper and larger issues of education rather than in terms of some divisive ism about education, even such an ism as progressivism. His philosophy, here expressed in its most essential, most readable form, predicates an American educational system that respects all sources of experience, on that offers a true learning situation that is both historical and social, both orderly and dynamic.

Pedagogies for Student-Centered Learning Cari Crumly, Pamela Dietz, Sarah D'Angelo, 2014 This book will help you to

identify the difference between teacher-centered and student-centered learning and the various pedagogies commonly associated with each. This book will draw upon the research and experience of three different educators and their pedagogical variations and uses within the classroom and online. Crumley's synopsis of pedagogies and student-centered learning and suggested action is followed by a collaborative dialogue with Pamela Dietz and Sarah d'Angelo.

Democracy and Education John Dewey,1921

Democracy and Education John Dewey,1997-01-01

How We Think John Dewey,2011-09-16 Preface:Our schools are troubled with a multiplication of studies, each in turn having its own multiplication of materials and principles. Our teachers find their tasks made heavier in that they have come to deal with pupils individually and not merely in mass. Unless these steps in advance are to end in distraction, some clew of unity, some principle that makes for simplification, must be found. This book represents the conviction that the needed steadying and centralizing factor is found in adopting as the end of endeavor that attitude of mind, that habit of thought, which we call scientific. This scientific attitude of mind might, conceivably, be quite irrelevant to teaching children and youth. But this book also represents the conviction that such is not the case; that the native and unspoiled attitude of childhood, marked by ardent curiosity, fertile imagination, and love of experimental inquiry, is near, very near, to the attitude of the scientific mind. If these pages assist any to appreciate this kinship and to consider seriously how its recognition in educational practice would make for individual happiness and the reduction of social waste, the book will amply have served its purpose.Contents:What Is Thought?The Need For Training ThoughtNatural Resources In The Training Of ThoughtSchool Conditions And The Training Of ThoughtMental Training: The Psychological And The LogicalThe Analysis Of A Complete Act Of ThoughtSystematic Inference: Induction And DeductionJudgment: The Interpretation Of FactsMeaning: Or Conceptions And UnderstandingConcrete And Abstract ThinkingEmpirical And Scientific ThinkingActivity And The Training Of ThoughtLanguage And The Training Of ThoughtObservation And Information In The Training Of MindThe Recitation And The Training Of ThoughtSome General ConclusionsHow We Think also includes;* A Brief Overview of Progressive Education * A Brief Biography of John Dewey* Quotes of John Dewey

Survival of the Fittest Qi Li,Cynthia Gerstl-Pepin,2013-11-29 This book will examine how universities in China and the US are responding to markets and increasing global competition. For both countries, a university education is seen as key to economic development. While China and the US have two very different political systems, they represent the two largest economies in the world and share beliefs that higher education plays an integral role to economic development. The book will bring together scholars with multiple perspectives on the topic to create dialogue around similarities and differences. This book will appeal to students, scholars, and higher educational administrators in both countries and other countries as well who are seeking to understand the strategic change in higher education in both China and the US.
