Isaac Newton vs. Robert Hooke on the law of universal gravitation Nicolae Sfetcu, 2019-03-08 One of the most disputed controversy over the priority of scientific discoveries is that of the law of universal gravitation, between Isaac Newton and Robert Hooke. Hooke accused Newton of plagiarism, of taking over his ideas expressed in previous works. In this paper I try to show, on the basis of previous analysis, that both scientists were wrong: Robert Hooke because his theory was basically only ideas that would never have materialized without Isaac Newton's mathematical support; and the latter was wrong by not recognizing Hooke's ideas in drawing up the theory of gravity. Moreover, after Hooke's death and taking over the Royal Society presidency, Newton removed from the institution any trace of the former president Robert Hooke. For this, I detail the accusations and arguments of each of the parts, and how this dispute was perceived by the contemporaries of the two scientists. I finish the paper with the conclusions drawn from the contents. Keywords: Isaac Newton, Robert Hooke, law of gravity, priority, plagiarism CONTENTS Abstract Introduction Robert Hooke's contribution to the law of universal gravitation Isaac Newton's contribution to the law of universal gravitation Robert Hooke's claim of his priority on the law of universal gravitation Newton's defense The controversy in the opinion of other contemporary scientists What the supporters of Isaac Newton say What the supporters of Robert Hooke say Conclusions Bibliography DOI: 10.13140/RG.2.2.19370.26567

Physics for Scientists and Engineers Lawrence S. Lerner, 1996 This refreshing new text is a friendly companion to help students master the challenging concepts in a standard two- or three-semester, calculus-based physics course. Dr. Lerner carefully develops every concept with detailed explanations while incorporating the mathematical underpinnings of the concepts. This juxtaposition enables students to attain a deeper understanding of physical concepts while developing their skill at manipulating equations.

NEW THEORY OF PLANETARY MOTION AND NEW FORMULA OF UNIVERSAL GRAVITATION WANG JIANHUA, 2022-09-12 If the solar system is regarded as a moving mass point system, then both the planet m and the sun M move around the solar system mass center O . According to the motion law of the mass point system and the centripetal force formula of the curve, it can be determined through theoretical analysis and mathematical derivation: (1) Kepler's law of planetary motion contradicts the motion rules of mass point systems. (2) The universal gravitational force F between planet m and sun M . K is the new gravitational constant. The force F' on the object m in the inertial frame S' . In the formula, V' is the velocity of the object m in the inertial frame S' , and u is the velocity of the inertial frame S' in the cosmic space reference frame. In addition, the author designed three new optical experiments based on the light interference theory to verify whether the principle of constant speed of light conforms to objective facts. Experiment 1. Using the new front and rear hole laser interferometer for verification; Experiment 2. Verification of using long and short optical path Michelson interferometers; Experiment 3. Verification of using a double-hole interferometer.

Divine Action, Determinism, and the Laws of Nature Jeffrey Koperski, 2019-11-28 A longstanding question at the intersection of science, philosophy, and theology is how God might act, or not, when governing the universe. Many believe that determinism would prevent God from acting at all, since to do so would require violating the laws of nature. However, when a robust view of these laws is coupled with the kind of determinism now used in dynamics, a new model of divine action emerges. This book presents a new approach to divine action beyond the current focus on quantum mechanics and esoteric gaps in the causal order. It bases this approach on two general points. First, that there are laws of nature is not merely a metaphor. Second, laws and physical determinism are now understood in mathematically precise ways that have important implications for metaphysics. The explication of these two claims shows not only that nonviolationist divine action is possible, but there is considerably more freedom available for God to act than current models allow. By bringing a philosophical perspective to an issue often dominated by theologians and scientists, this text redresses an imbalance in the discussion around divine action. It will, therefore, be of keen interest to scholars of Philosophy and Religion, the Philosophy of Science,

and Theology.

Physics John D. Cutnell,Kenneth W. Johnson,David Young,Shane Stadler,2018-02-15 Physics 11E provides students with the skills that they need to succeed in this course, by focusing on conceptual understanding; problem solving; and providing real-world applications and relevance. Conceptual Examples, Concepts and Calculations problems, and Check Your Understanding questions help students to understand physics principles. Math Skills boxes, multi-concept problems, and Examples with reasoning steps help students to improve their reasoning skills while solving problems. “The Physics Of” boxes show students how physics principles are relevant to their everyday lives. Available/sold separately, WileyPLUS to accompany Physics 11E continues to build on rich multimedia enhancements that encourage student engagement. ORION, the adaptive study guide, diagnoses student’s strengths and weaknesses, leading them to the specific content and media needed to help them effectively learn. All ORION practice problems have hints and feedback. The course includes 259 short lecture videos, one for each course section, that explain the basic concepts and learning objectives. In addition, 150 Chalkboard problem-solving videos and guided online tutorials along with vector drawing questions enrich WileyPLUS. These features are designed to facilitate flipping the classroom, and to encourage students to remain within the WileyPLUS environment, as opposed to pursuing the “pay-for-solutions” websites and searching uncurated web content that short circuits and can confuse their learning process. .
