Massively Multiplayer Online Role-Playing Games R.V. Kelly 2, 2004-09-06 This book is about the fastest growing form of electronic game in the world--the Massively Multiplayer Online Role Playing Game (MMORPG). The evolution of these self-contained three-dimensional virtual worlds, often inhabited by thousands of players, is described here. This work also delves into the psychology of the people who inhabit the game universe and explores the development of the unique cultures, economies, moral codes, and slang in these virtual communities. It explains how the games are built, the spin-offs that players create to enhance their game lives, and peeks at the future of MMORPGs as they evolve from a form of amusement to an educational, scientific, and business tool. Based on hundreds of interviews over a three-year period, the work explores reasons people are attracted to and addicted to these games. It also surveys many existing and upcoming games, identifying their unique features and attractions. Two appendices list online addiction organizations and MMORPG information sites.

MMOs from the Outside In Richard A. Bartle, 2015-12-30 This follow-up volume to *MMOs from the Inside Out* is a further collection of bold ideas, information, and instruction from one of the true pioneers of Massively-Multiplayer Online Role-Playing Games. Whereas its predecessor looked at how MMOs can change the world, *MMOs from the Outside In: How Psychology, Law, Culture and Real Life see Massively-Multiplayer Role-playing Games* looks at how the world can change MMOs - and not always for the better. The aim of this book is to inform an up-coming generation of designers, to alert and educate players and designers-to-be, and to caution those already working in the field who might be growing complacent about society's acceptance of their chosen career. Playing and creating MMOs does not happen in a bubble. MMOs are so packed with potential that those who don't understand them can be afraid, and those who do understand them can neglect their wider impact. Today's examples are little more than small, pioneering colonies on the shore of a vast, uncharted continent. What monsters lurk beyond the horizon? What horrors will explorers bring back to torment us? *MMOs from the Outside In* is for people with a spark of curiosity: it pours gasoline on that spark. It: • Explains how MMOs are perceived, how they could - and perhaps should - be perceived, and how they can contribute to wider society. • Delves into what researchers

think about why players play. • Encourages, enthuses, enrages, engages, enlightens, envisions, and enchants. • Doesn't tell you what to think, it tells you to think. What You Will Learn: • The myriad challenges facing MMOs – and to decide for yourself how to address these challenges. • What MMOs bring to the world that it didn't have before. • How MMOs are regarded, and what this means for how they will be regarded in future. • That playing and designing MMOs has implications for those who don't play or design them. Whom This Book is For: MMOs from the Outside In is a book for those who wish to know more about the wider influence of game design in general and MMO design in particular. It's for people who play MMOs, for people who design MMOs, and for people who study MMOs. It's for people with a yearning to see beyond the worlds of their imagination and to change the world around them.

MMOs from the Inside Out Richard A. Bartle, 2015-12-30 This is an astonishing collection of ideas, information, and instruction from one of the true pioneers of Massively-Multiplayer Online Role-Playing Games. MMOs from the Inside Out: The History, Design, Fun, and Art of Massively-Multiplayer Role-playing Games speaks to the designers and players of MMOs, taking it as axiomatic that such games are inspirational and boundless forces for good. The aim of this book is to enthuse an up-coming generation of designers, to inspire and educate players and designers-to-be, and to reinvigorate those already working in the field who might be wondering if it's still all worthwhile. Playing MMOs is about fun, immersion, and identity. Creating MMOs is about imagination, expression, and art. MMOs are so packed with potential that today's examples are little more than small, pioneering colonies on the shore of a vast, uncharted continent. What wonders wait beyond the horizon? What treasures will explorers bring back to amaze us? MMOs from the Inside Out is for people with a spark of creativity: it pours gasoline on that spark. It: Explains what MMOs are, what they once were, and what they could – and should – become. Delves into why players play, and why designers design. Encourages, enthuses, enrages, engages, enlightens, envisions, and enchants. Doesn't tell you what to think, it tells you to think. What You Will Learn: Myriad ways to improve MMOs – and to decide for yourself whether these are improvements. What MMOs are; who plays them, and why. How MMOs became what they are, and what this means for what they will become. That you have it in you to make MMOs yourself. Whom This Book is For: MMOs from the Inside Out is a book for those who wish to know more about game design in general and MMO design in particular. It's for people who play MMOs, for people who design MMOs, and for people who study MMOs. It's for people with a yearning to see beyond the world around them and to make manifest the worlds of their imagination.

Online Multiplayer Games William Sims Bainbridge, 2022-05-31 This lecture introduces fundamental principles of online multiplayer games, primarily massively multiplayer online role-playing games (MMORPGs), suitable for students and faculty

interested both in designing games and in doing research on them. The general focus is human-centered computing, which includes many human-computer interaction issues and emphasizes social computing, but also, looks at how the design of socio-economic interactions extends our traditional notions of computer programming to cover human beings as well as machines. In addition, it demonstrates a range of social science research methodologies, both quantitative and qualitative, that could be used by students for term papers, or by their professors for publications. In addition to drawing upon a rich literature about these games, this lecture is based on thousands of hours of first-hand research experience inside many classic examples, including World of Warcraft, The Matrix Online, Anarchy Online, Tabula Rasa, Entropia Universe, Dark Age of Camelot, Age of Conan, Lord of the Rings Online, Tale in the Desert, EVE Online, Star Wars Galaxies, Pirates of the Burning Sea, and the non-game virtual world Second Life. Among the topics covered are historical-cultural origins of leading games, technical constraints that shape the experience, rolecoding and social control, player personality and motivation, relationships with avatars and characters, virtual professions and economies, social relations inside games, and the implications for the external society. Virtual Currencies in Online Gaming Verena Kern, 2013-09-11 Master's Thesis from the year 2013 in the subject Communications - Journalism, Journalism Professions, grade: 1,0, Vrije University Brussel, language: English, abstract: This master thesis approaches the field of virtual currencies in online gaming. It pursues the overall question if it is possible, to establish a universal, virtual currency in the online gaming environment. It aims on showing how virtual currencies in their particular fields work, what the different mechanisms imply and who the stakeholders are. In order to give a comprehensive insight on the topic, framework issues such as clarification of terms in the field of virtual currencies in online gaming will be given. Furthermore, processes, consequences and legal aspects are provided. The core of the thesis contains the analysis of four case studies, covering a representative range of virtual currencies in four different areas of online gaming. The analysis contains a massive multiplayer online role playing game, a gaming application for smart phones, a social network with a gaming section and a virtual marketplace featuring browser games. With the help of a business modeling matrix and a platform typology the cases are analysed on parameters such as e.g. functional and financial architecture. The results, put together in a comparative overview, help to point out particular potentials, chances and risks of virtual currencies in online gaming.

Massively Multiplayer Online Role-playing Games: Problematic Use Andrew M. Byrne, 2013 Massively Multiplayer Online Role Playing Games (MMORPGs) are a form of mass media with potential for behavioral addiction among some users. In past literature on internet addiction, MMORPG users have been included alongside other internet users. The outcomes of MMORPG participation, usage frequency, and demographics have not been adequately analyzed apart from users of other internet-based functions. Screening instruments developed for internet addiction have not been validated on MMORPG users. This study addressed the lack of screening research on MMORPG users, using the Internet Addiction Test (IAT), the most used screening instrument for this media. It also explored demographic and frequency traits on a robust sample of MMORPG users. The population sampled was 5313 users of the MMORPG, World of Warcraft. Three research questions resulted from the literature search: an exploratory factor analysis, demographic and frequency exploration, and face validity. The first research question asked, What is the factor structure for the IAT when administered to a sample of MMORPG internet users? The exploratory factor analysis yielded a two-factor oblique factor structure which included 18 of the original 20 IAT questions. The second research question asked, What is the relationship of demographic variables (age, race, gender, weekly playing/gaming, and length of experience playing/gaming) to the final IAT score? Weak and moderate main effects on IAT score were found for age and weekly hours playing. The third research question asked, What is the relationship between score severity as reported by the IAT and respondents' impressions on whether they identify themselves as 'addicted to MMORPGs'? The IAT was found to be predictive of respondent perceptions of addiction. This research was the first to explore a factor structure for MMORPG users on a behavioral addiction instrument, and among the largest validation studies on the

IAT in English. The results were conceptualized through Uses and Gratifications theory as unique user media choices, and consistent with elements of behavioral addiction. The results also provided a distinct profile for MMORPG users. This research demonstrated the importance to counselors and counselor educators of robust sampling of homogeneous media user groups and individualized screening for addiction.
