Grant's Method of Anatomy John Charles Boileau Grant,John V. Basmajian,1980 This book provides a written description of where everything is in the body, its shape, size, relationship with other organs and passage (for veins nerves etc) which is essential for the medical student to be able to describe. If you are getting lovely diagrams in your exam to label then a standard colour plate anatomy text will be fine. But if for example you have to describe the surface anatomy and anatomical relationships of the duodenum then this book tells you how to do it. It also has excellent how to draw sections such as how to draw the bones in the hand. All the images are hand drawn so potentially able to be reproduced by the undifferentiated med student.
