Digital Capitalism and Its Limits Michel Bauwens,Ruth Castel-Branco,Mayssam Daaboul,Jane Duncan,Roc Kranjc,Michael Kwet,Seipati Mokhema,Constantine N. Nana,Ujala Satgoor,Vincent Siwawa,Edward Webster,Alex Mohubetswane Mashilo,2025-04 The Fourth Industrial Revolution (4IR) has been described as the next big leap in digital capitalism. Digital technologies such as artificial intelligence, quantum computing, 3D printing and robotisation, we are led to believe, will bring more progress, growth and development while also helping us to resolve the deep and multiple crises the world is in. Billions are being invested in these technologies, accompanied by sharp geopolitical rivalries to secure an edge in the control over them. Volume 8 in the Democratic Marxismseries invites readers to think more deeply and critically about digital capitalism and its limits. While most governments in the world, including South Africa, have accepted a techno-nationalist narrative and have deliberated on the risks for the planet and humanity, the volume interrogates the effects and consequences of advances in artificial intelligence and heightened technological innovation and industrialisation on employment, democracy and the climate. Viewing the grand social engineering of 4IR through a Marxist lens, the volume contributors engage critically with the class project of digital monopoly capitalism and its powerful totalitarian tendencies. They question the dangerous technotopian imaginary shaping this digital techno-shift, the implications of algorithmic data extractivism, the securitisation of already weak market democracies, the social consequences of digital learning, lack of regulation, and the power dynamics in the labour process. Anchored in techno-realism, the interdisciplinary perspective captured in this volume puts forward alternatives for democratisation and a just transition to protect human and non-human life.

Novel Antibacterial Biomaterials for Medical Applications and Modeling of Drug Release Process Vesna Mišković-Stanković,Teodor Atanackovic,2024-06-12 This book provides a comprehensive review of synthesis and physicochemical and biological characterization of novel antibacterial biomaterials produced according to original procedures and aimed at medical applications such as wound dressing, soft and hard tissue implants, drug delivery devices, and carriers for cell cultivation. It is intended for all researchers working in the fields of biomaterials and biomedical engineering, as well as medical professionals, science and engineering graduate students, academics, and industrial researchers. Includes in-depth discussions on synthesis and physicochemical characterization of novel poly vinyl alcohol-based hydrogels aimed at wound dressings and soft tissue implants Explores synthesis and physicochemical characterization

of novel bioceramic hydroxyapatite-based coatings on metal surface aimed for hard tissue implants Reviews cytotoxicity and antibacterial activity of novel poly vinyl alcohol-based hydrogels aimed for wound dressing and soft tissue implants Discusses cytotoxicity and antibacterial activity of bioceramic hydroxyapatite-based coatings on metal surface aimed for hard tissue implants Provides original fractional derivative models of drug release process from hydrogels and bioceramic coatings on metal surface and explores diffusion mechanism

C# 11 and .NET 7 – Modern Cross-Platform Development Fundamentals Mark J. Price,2022-11-08 Publisher's Note: Microsoft will stop supporting .NET 7 from May 2024. The newer 8th edition of the book is available that covers .NET 8 (end-of-life November 2026) with C# 12 and EF Core. Purchase of the print or Kindle book includes a free PDF eBook Key Features Explore the newest additions to C# 11, the .NET 7 class libraries, and Entity Framework Core 7 Create professional websites and services with ASP.NET Core 7 and Blazor Build your confidence with step-by-step code examples and tips for best practices Book DescriptionExtensively revised to accommodate the latest features that come with C# 11 and .NET 7, this latest edition of our guide will get you coding in C# with confidence. You'll learn object-oriented programming, writing, testing, and debugging functions, implementing interfaces, and inheriting classes. Next, you'll take on .NET APIs for performing tasks like managing and querying data, working with the filesystem, and serialization. As you progress, you'll also explore examples of cross-platform projects you can build and deploy, such as websites and services using ASP.NET Core. Instead of distracting you with unnecessary graphical user interface code, the first eleven chapters will teach you about C# language constructs and many of the .NET libraries through simple console applications. Having mastered the basics, you'll then start building websites, web services, and browser apps. By the end of this book, you'll be able to create rich web experiences and have a solid grasp of object-oriented programming that you can build upon.What you will learn Build rich web experiences using Blazor, Razor Pages, the Model-View-Controller (MVC) pattern, and other features of ASP.NET Core Write, test, and debug functions Query and manipulate data using LINQ Integrate and update databases in your apps using Entity Framework Core models Build and consume powerful services using the latest technologies, including Web API and Minimal API For .NET 6 developers: C# 11 can be used with .NET 6, including features like raw string literals EF Core 7 targets .NET 6, so you can benefit from its new features like ExecuteUpdate and ExecuteDelete for more efficient data modifications Who this book is forThis book is primarily for beginners, but intermediate-level C# and .NET programmers who have worked with C# in the past and want to catch up with the changes made in the past few years will also find plenty of useful information in it. Prior exposure to C# or .NET is not a prerequisite, but you should have a general understanding of programming before you jump in. If you already have some C# and .NET skills and want to focus on developing apps, we

recommend that you pick up Mark's other .NET book, Apps and Services with .NET 7, instead.

Christians in Iraqi Kurdistan Jeffrey Kaplan,2025-09-26 In March of 2023, a group of researchers from the Danube Institute in Budapest, Hungary, undertook three weeks of intensive fieldwork in Iraqi Kurdistan, visiting major cities, small towns and villages throughout the region. The research is part of a multi-nation project, Attacks on Christian Communities and Institutions, which is jointly sponsored by the Danube Institute, Hungary Helps and the Batthyány Lajos Foundation. This book represents the fruits of this research. In its pages you will hear church leaders, government officials and military officers as well as ordinary citizens in their own voices. Included also are academic articles from noted scholars and NGO leaders as well as detailed transcripts of the interviews conducted by the Danube Institute researchers. Together this book presents a complete picture of the situations of both Christians and Yezidis in Iraqi Kurdistan in the period immediately following the defeat of ISIS.

Serialization, Commercialization and the Children's Classics Amy Webster,2024-12-12 An exploration of the serialization of children's classics by contemporary publishers, this book digs into the impact of the practice and provides new ways of reading the corpus of British children's literature from the 20th century. Amy Webster demonstrates how publishers select texts for their series, which texts they omit, which outliers are sometimes included and how a core group of works from the golden age of children's literature emerged. The text also examines how texts are abridged and transformed from publisher to publisher through close readings of The Wind in the Willows and Alice's Adventures in Wonderland; and how the repackaging of works within a series highlight issues and choices tied to key paratextual elements. Analysing data through distant reading and close reading of series from Ladybird, Longman, Puffin and Walker Illustrated editions, this book sheds light on how modern classics series are marked by variation and instability but also a reductive homogeneity. Through her use of quantitative and text-focused research, Webster reveals how commercial motivations have created a gulf between the canonical concepts of the classic and how the term functions as a marketing tool in British children's publishing. With notions of what counts as a classic compromised and complicated, this book leads the call for a critical approach towards both the term 'classic' and to reading children's classics that acknowledges how they are tied to the commercial enterprises of the children's book business.

Exploring Woke in Educational Policy and Practice Grant Rodwell,2025-12-10 Written at a time when the understanding of 'woke' is being increasingly challenged by governments and authorities, this book traces woke back to its early 20th-century origins to understand and focus on its transnationalism, promotion and impact in current school and college classroom practice, principally in Australia, the UK and the US. Chapters present a transnational study of the politics of promotion and impact of and opposition to woke in school and college educational policy and practice. In doing so, the book explores the ideals and practices of political correctness, Critical Race Theory (CRT), Social and Emotional Learning

(SEL), diversity, equity and inclusion (DEI) and intersectionality. Further, it demonstrates the ability of 'woke' to mobilize and raise awareness around social issues, challenging existing power structures and demanding change. Investigating these as a contemporary embodiment of early 20th-century progressivism, the author argues that 'woke' is best understood through its association with moral panic, risk society mentality, post-truth, cancel culture and the rise of it in social media. This exemplary volume will be of interest to scholars, researchers and academics in the field of education policy and politics, sociology of education, cultural studies and race theory. Those involved in tertiary training of teachers and curriculum developers may also benefit from it more broadly.

Eritrea's Gold Rush Charlotte Touati,2025-10-02 Leading Horn of Africa expert Charlotte Touati exposes the role played by Canadian gold mining company Nevsun and other global actors in propping up the regime of Isayas Aferwerki, one of

Africa's most dangerous dictators.? In so doing, Touati shows how global capital networkshelp perpetuate economic and political instability in the Horn of Africa, which in turn is fostering violence and volatility throughout other parts of the world. Using a narrative framework and a core cast of characters to help guide non-specialist readers through her findings, Touati explains the enormous significance of how Nevsun partnered with Aferwerki to open the Bisha gold mine and save his regime from bankruptcy. As Touati relates, when Eritrean refugees later claimed they were "conscripted" to work in the mines without pay and abused as part of their National Service, Nevsun hired lobbyists to defend Eritrea's actions and cast the very notion of human rights as a Western "Trojan horse." Australian, Chinese, and Russian actors gradually became involved, and philological analysis shows that the propaganda and disinformation campaigns of the infamous Russian Wagner Group ultimately stem from the rhetoric of Afewerki and his lobbyists. Ultimately, this violently anti-Western rhetoric was injected into a pan-Africanist discourse to become an ideological and rhetorical toolbox. It was used to prevent any intervention on behalf of Eritreans trapped in their own country or Tigrayans genocided in neighboring Ethiopia in the name of sovereignty, and also to legitimize new conflicts throughout the Sahel and the rest of Africa's notorious "Coup Belt." It takes on even wider global dimensions when we consider the ongoing crisis around the Red Sea ports, which Eritrea controls, and the question of the influence of the Gulf States in the Horn of Africa.
