The Lost Laws of Manifestation Dominic Creed,2025-10-16 While others seem to attract breakthroughs, clarity, and results almost effortlessly... you keep asking, Why isn't it working for me? This book gives you the real answer. Hidden not because it's secret, but because it was never taught in the language your body and field understand. It reveals the forgotten mechanics that truly shape reality, far beneath thought, mindset, or surface-level visualization. The people who consistently manifest what they want are not thinking better. They're operating from a deeper alignment that most never access. Now, so can you. What You'll Learn Inside:

- Why your manifestations feel blocked even when you do everything right
- The missing link between nervous system, field intelligence, and reality creation
- How to restore signal clarity so your field stops attracting the wrong things
- How belief translates into hormones, frequency, and real-world shifts
- Why spiritual teachings

often leave you stuck, and how to finally move forward □ A step-by-step protocol to reprogram your body, mind, and environment into coherence This isn't about repeating affirmations until you believe them. It's about learning how reality actually responds, and how to align with it at the level that matters. No more chasing. No more guessing. Just precision, resonance, and quiet inner authority. If you've ever sensed that reality responds to something deeper than thought... You were right. This book shows you what that is. Read it. Apply it. And finally experience what alignment really feels like.

Reality Unveiled Bernardo Sotomayor Valdivia, 2014-04-01 The idea that the universe is not made up of solid matter and that all that we perceive as objects —from atoms to stars— are really waves, has been around for a long time, going back to ancient Greece. As you can see, the existence of matter-waves is not a new concept. Ever since the physicist Prince Louis de Broglie formally suggested them in 1924, the modern scientific world has accepted the concept as a possibility but has not been able to rationally accept it for various reasons. Einstein hinted to the existence of matter-waves —while perhaps unaware of it— with his formulation of Special Relativity, which implied mass-energy equivalence. How can an object contract into an infinitesimal length as it approaches the speed of light and then go back to normal when it slows down without catastrophic structural damage? Spacetime may contract, but how is the structure of matter linked to spacetime so that it also contracts without damage? Einstein states that mass somehow transitions to energy and vice versa, not explaining the details of how and ignoring that energy and mass are such very different observables. The standard reasoning is that they are different manifestations of the same thing. But what is this “thing”, this substance that remains so infinitely malleable under special relativity and such a chameleon under mass-energy equivalence? Waves come to mind, but although they may be very malleable, can they be infinitely malleable and yet also have the property of forming rigid structures in order to pose as matter? What if matter and spacetime are both the same, synthesized by waves, and the substance that is waving is not a substance; does all of the above then become possible and rationally acceptable? Reality Unveiled explores, explains and justifies that possibility.
