German Practice in International Law: Volume 1 Stefan Talmon, 2022-06-09 Customary international law is based on State practice. This book presents the international law practice of Germany, the world's fourth-largest economy and a powerhouse of the European Union. That practice makes an important contribution to the creation and development of customary international law. It is the first and only presentation in English of German practice in the field of international law. The 2019 volume also provides comprehensive coverage of Germany's membership of the United Nations Security Council. The book combines a case study approach, providing analysis and commentary on Germany's practice, with a classic digest of primary materials, including diplomatic correspondence, statements and court decisions. The book is an ideal complement to other compilations of international law practice and is an essential resource for scholars and practitioners of international law. It will also be of interest to scholars of international relations, politics and diplomatic studies.

The Crime of Aggression under the Rome Statute of the International Criminal Court Carrie McDougall, 2021-08-12 After the crime of aggression was adopted under the Rome Statute of the International Criminal Court, Carrie McDougall used her intimate involvement in the crime's negotiations, combined with extensive scholarly reflection to produce the first and most comprehensive academic study. This updated second edition offers an exhaustive and sophisticated legal analysis of the crime's definition, as well as the provisions governing the ICC's exercise of jurisdiction over the crime. It explores the desirability of holding individuals to account for unlawful uses of inter-State armed force, the geo-political significance of the crime and a range of practical issues likely to arise in prosecutions before both the ICC and domestic courts. This book is highly relevant to all academics and practitioners interested in the crime of aggression, as well as broader issues relating to the prohibition of the use of force, international criminal law and the ICC.

Russophobia Glenn Diesen,2022-04-22 This book defines Russophobia as the irrational fear of Russia, a key theme in the study of propaganda in the West as Russia has throughout history been assigned a diametrically opposite identity as the “Other.” Propaganda is the science of convincing an audience without appealing to reason. The West and Russia have been juxtaposed as Western versus Eastern, European versus Asiatic, civilized versus barbaric, modern versus backward, liberal versus autocratic, and even good versus evil. During the Cold War, ideological dividing lines fell naturally by casting the debate as capitalism versus communism, democracy versus totalitarianism, and Christianity versus atheism. After the Cold War, anti-Russian propaganda aims to filter all political questions through the simplistic binary stereotype of democracy versus authoritarianism, which provides little if any heuristic value to understand the complexities of relations. A key feature of propaganda against the inferior “Other” is both contemptuous derision and panic-stricken fear of the threat to civilization. Russia has therefore throughout history been allowed to play one of two roles—either an apprentice of Western civilization by accepting the subordinate role as the student and political object, or a threat that must be contained or defeated. While propaganda has the positive effect of promoting unity and mobilizing resources toward rational and strategic objectives, it can also have the negative effect of creating irrational decision-making and obstructing a workable peace.

Security Challenges In Contemporary Indo-pacific Zhiquan Zhu,2025-04-02 The Indo-Pacific is arguably the most important and most dynamic region in the world today, with numerous opportunities and challenges. This book covers major security challenges in the Indo-Pacific region. Both traditional security challenges such as border and maritime disputes, arms races, weapons of mass destruction and sovereignty, and non-traditional security challenges such as demography, public health, climate change and the environment are addressed. Contributors who hail from Australia, China, India, Japan, the Philippines, Singapore, Taiwan, the United States, Vietnam, and elsewhere carefully examine key security challenges facing some individual countries or the region as a whole and discuss policy implications moving forward.

Investment Rules for the Global Economy Pierre Sauvé,Daniel Schwanen,1996 A key element in the formal liberalisation of the global marketplace is the codification of relations between states and foreign investors. Such codification has become an essential complement to the existing elaborate rules governing trade flows, since trade and investment increasingly complement each other. This book presents a collection of papers that document the current state of international investor-state relations, examine the technical and theoretical issues underlying the need for multilateral rules on investment, and

discuss proposals for the content and process of such a rule-making initiative. Topics of the papers consider such matters as existing investment instruments, negotiation of an agreement on foreign direct investment, lessons learned from NAFTA, investment barriers, private and public impediments to market presence, and tax harmonisation.
