Sign Language Ideologies in Practice Annelies Kusters, Mara Green, Erin Moriarty, Kristin Snoddon, 2020-08-10 This book focuses on how sign language ideologies influence, manifest in, and are challenged by communicative practices. Sign languages are minority languages using the visual-gestural and tactile modalities, whose affordances are very different from those of spoken languages using the auditory-oral modality.

With Justice for All John K. Trammell, 2023-09-22 Social history is only one kind of history. Still, it is exactly the type of history that disability demands to be told, especially due to the universality of the disability experience. Doris and Frieda Zames remind us that “handicapism” is the only “ism” we all will experience if we live long enough. Although disability will always arguably be about physical differences (of body, mind, intellect, personality, etc.), its universal nature means that it should logically be the king/queen of identity politics, while it has long been the pauper. This story helps explain why that was and is today, and what America’s unique and sometimes unpleasant role in the story is. This text attempts not just to represent the American experience with disability but the American experience. The further we move away from 1990 and the passage of the ADA, the less that demarcation seems to be distinct and dichotomous, and the more America seems to be an abject case study of identity possibility in flux, placed squarely at the intersection of the rational and irrational, the qualitative and quantitative, the old and new, the individual and collective, and at the nexus of classic liberalism and neomodernism. In fact, the ADA was reauthorized in 2008, an indication of the constructivist nature of disability policy. This book is intended to be useful and informative, whether as a classroom textbook or as a conversation starter on the coffee table. It also uses the unique tools of the social historian to tell the story.

A Family-Centered Signed Language Curriculum to Support Deaf Children's Language Acquisition Razi M. Zarchy, Leah C. Geer, 2023-08-24 Deaf children experience language deprivation at alarmingly high rates. One contributing factor is that most are born to non-signing hearing parents who face insurmountable barriers to learning a signed language. This Element presents a case for developing signed language curricula for hearing families with deaf children that are family-centered and focus on child-directed language. Core vocabulary, functional sentences, and facilitative language techniques centered around common daily routines allow families to apply what they learn immediately. Additionally, Deaf Community Cultural Wealth (DCCW) lessons build families' capacity to navigate the new terrain of raising a deaf child. If early intervention programs serving the families of young deaf children incorporate this type of curriculum into their service delivery, survey data suggest that it is both effective and approachable for this target population, so the rates of language deprivation may decline.

Sign Language in Action Jemina Napier, Lorraine Leeson, 2016-01-26 This book defines the notion of applied sign linguistics by drawing on data from projects that have explored sign language in action in various domains. The book gives professionals working with sign languages, signed language teachers and students, research students and their supervisors, authoritative access to current ideas and practice.

Teaching and Learning Signed Languages D. McKee, R. Rosen, 2014-02-27 Teaching and Learning Signed Languages examines current practices, contexts, and the research nexus in the teaching and learning of signed languages, offering a contemporary, international survey of innovations in this field.
