The Immortality Key Brian C. Muraresku, 2020-09-29 THE NEW YORK TIMES BESTSELLER As seen on The Joe Rogan Experience! A groundbreaking dive into the role psychedelics have played in the origins of Western civilization, and the real-life quest for the Holy Grail that could shake the Church to its foundations. The most influential religious historian of the 20th century, Huston Smith, once referred to it as the best-kept secret in history. Did the Ancient Greeks use drugs to find God? And did the earliest Christians inherit the same, secret tradition? A profound knowledge of visionary plants, herbs and fungi passed from one generation to the next, ever since the Stone Age? There is zero archaeological evidence for the original Eucharist – the sacred wine said to guarantee life after death for those who drink the blood of Jesus. The Holy Grail and its miraculous contents have never been found. In the absence of any hard data, whatever happened at the Last Supper remains an article of faith for today's 2.5 billion Christians. In an unprecedented search for answers, *The Immortality Key* examines the archaic roots of the ritual that is performed every Sunday for nearly one third of the planet. Religion and science converge to paint a radical picture of Christianity's founding event. And after centuries of debate, to solve history's greatest puzzle. Before the birth of Jesus, the Ancient Greeks found salvation in their own sacraments. Sacred beverages were routinely consumed as part of the so-called Ancient Mysteries – elaborate rites that led initiates to the brink of death. The best and brightest from Athens and Rome flocked to the spiritual capital of Eleusis, where a holy beer unleashed heavenly visions for two thousand years. Others drank the holy wine of Dionysus to become one with the god. In the 1970s, renegade scholars claimed this beer and wine – the original sacraments of Western civilization – were spiked with mind-altering drugs. In recent years, vindication for the disgraced theory has been quietly mounting in the laboratory. The constantly advancing fields of archaeobotany and archaeochemistry have hinted at the enduring use of hallucinogenic drinks in antiquity. And with a single dose of psilocybin, the psychopharmacologists at Johns Hopkins and NYU are now turning self-proclaimed atheists into instant believers. But the smoking gun remains elusive. If these sacraments survived for thousands of years in our remote prehistory, from the Stone Age to the Ancient Greeks, did they also survive into the age of Jesus? Was the Eucharist of the earliest Christians, in fact, a psychedelic Eucharist? With an unquenchable thirst for evidence, Muraresku takes the reader on his twelve-year global hunt for proof. He tours the ruins of Greece with its government archaeologists. He gains access to the hidden collections of the Louvre to show the continuity from pagan to Christian wine. He unravels the Ancient

Greek of the New Testament with the world's most controversial priest. He spelunks into the catacombs under the streets of Rome to decipher the lost symbols of Christianity's oldest monuments. He breaches the secret archives of the Vatican to unearth manuscripts never before translated into English. And with leads from the archaeological chemists at UPenn and MIT, he unveils the first scientific data for the ritual use of psychedelic drugs in classical antiquity. The Immortality Key reconstructs the suppressed history of women consecrating a forbidden, drugged Eucharist that was later banned by the Church Fathers. Women who were then targeted as witches during the Inquisition, when Europe's sacred pharmacology largely disappeared. If the scientists of today have resurrected this technology, then Christianity is in crisis. Unless it returns to its roots. Featuring a Foreword by Graham Hancock, the NYT bestselling author of *America Before*.

Handbook of Medical Hallucinogens Charles S. Grob, Jim Grigsby, 2021-03-09 This handbook reviews promising applications of psychedelics in treatment of such challenging psychiatric problems as posttraumatic stress disorder, major depression, substance use disorders, and end-of-life anxiety. Experts from multiple disciplines synthesize current knowledge on psilocybin, MDMA, ketamine, and other medical hallucinogens. The volume comprehensively examines these substances' neurobiological mechanisms, clinical effects, therapeutic potential, risks, and anthropological and historical contexts. Coverage ranges from basic science to practical clinical considerations, including patient screening and selection, dosages and routes of administration, how psychedelic-assisted sessions are structured and conducted, and management of adverse reactions.

Comparing Religions Jeffrey J. Kripal, Ata Anzali, Andrea R. Jain, Erin Prophet, Stefan Sanchez, 2024-03-15 Teaches students the art and practice of comparison in the globalizing world, fully updated to reflect recent scholarship and major developments in the field *Comparing Religions: The Study of Us that Changes Us* is a wholly original, absorbing, and provocative reimagining of the comparative study of religion in the 21st century. The first textbook of its kind to foreground the extraordinary or “paranormal” aspects of religious experience, this innovative volume reviews the fundamental tenets of the world’s religions, discusses the benefits and problems of comparative inquiry, explores how the practice can impact a person's worldview and values, and much more. Asserting that religions have always engaged in comparing one another, the authors provide insights into the history, trends, debates, and questions of explicit comparativism in the modern world. Easily accessible chapters examine the challenges of studying religion using a comparative approach rather than focusing on religious identity, inspiring students to think seriously about religious pluralism as they engage in comparative practice. Throughout the text, a wealth of diverse case studies and vivid illustrations are complemented by chapter outlines, summaries, toolkits, discussion questions, and other learning features. Substantially updated with new and revised material, the second edition of *Comparing Religions: Draws from both comparative work and critical theory to present a well-balanced introduction to contemporary practice Explains classic comparative themes, provides a historical outline of comparative practices, and offers key strategies for understanding, analyzing, and re-reading religion Draws on a wide range of religious traditions to illustrate the complexity and efficacy of comparative practice Embraces the transcendent nature of the religious experience in all its forms, including in popular culture, film, and television Contains a classroom-proven, three-part structure with easy-to-digest, thematically organized chapters Features a companion website with information on individual religious traditions, additional images, a glossary, discussion questions, and links to supplementary material* *Comparing Religions: The Study of Us that Changes Us, Second Edition*, is the perfect textbook for undergraduate students and faculty in comparative religion, the study of religion, and world religions, as well as a valuable resource for general readers interested in understanding this rewarding area.

This Is Your Mind on Plants Michael Pollan, 2022-07-19 The instant New York Times bestseller | A Washington Post Notable Book | One of NPR's Best Books of the Year “Expert storytelling . . . [Pollan] masterfully elevates a series of big questions about drugs, plants and humans that are likely to leave readers thinking in new ways.” —New York Times Book Review From #1 New York Times bestselling author Michael Pollan, a radical challenge to how we think about drugs, and an exploration into the powerful human attraction to psychoactive plants—and the equally powerful taboos. Of all the things humans rely on plants for—sustenance, beauty, medicine, fragrance, flavor, fiber—surely the most curious is our use of them to change consciousness: to stimulate or calm, fiddle with or completely alter, the qualities of our mental experience. Take coffee and tea: People around the world rely on caffeine to sharpen their minds. But we do not usually think of caffeine as a

drug, or our daily use as an addiction, because it is legal and socially acceptable. So, then, what is a “drug”? And why, for example, is making tea from the leaves of a tea plant acceptable, but making tea from a seed head of an opium poppy a federal crime? In *This Is Your Mind on Plants*, Michael Pollan dives deep into three plant drugs—opium, caffeine, and mescaline—and throws the fundamental strangeness, and arbitrariness, of our thinking about them into sharp relief. Exploring and participating in the cultures that have grown up around these drugs while consuming (or, in the case of caffeine, trying not to consume) them, Pollan reckons with the powerful human attraction to psychoactive plants. Why do we go to such great lengths to seek these shifts in consciousness, and then why do we fence that universal desire with laws and customs and fraught feelings? In this unique blend of history, science, and memoir, as well as participatory journalism, Pollan examines and experiences these plants from several very different angles and contexts, and shines a fresh light on a subject that is all too often treated reductively—as a drug, whether licit or illicit. But that is one of the least interesting things you can say about these plants, Pollan shows, for when we take them into our bodies and let them change our minds, we are engaging with nature in one of the most profound ways we can. Based in part on an essay published almost twenty-five years ago, this groundbreaking and singular consideration of psychoactive plants, and our attraction to them through time, holds up a mirror to our fundamental human needs and aspirations, the operations of our minds, and our entanglement with the natural world.

What does this SNAP Summary Include? - Synopsis of the original book - Key takeaways from each chapter - A history of the immortality potion that was at the heart of every major religion - How this potion was buried, and how it is re-emerging and sparking a new spiritual revival - Editorial Review - Background on Brian C. Muraresku About the Original Book: There is a lot of scholarship on the cultural landscape of Ancient Greeks and early Christians, but almost none of it addresses some controversial questions that have been raised over the years. Did the religious rituals of the Ancient Greeks center around a sacrament of hallucinogenic beer and wine? Did early Christians borrow this sacrament and later replace it with ordinary bread and wine? Is the psychedelic renaissance of the twenty-first century a return to something familiar? To find the answers, Muraresku spends a decade digging into the history of the Greco-Roman world and goes on an epic journey that

takes him to numerous archaeological sites in Greece, Italy, and Spain. What emerges is a well-researched narrative that is as shocking as it is entertaining. **DISCLAIMER:** This book is intended as a companion to, not a replacement for, The Immortality Key.
