Alice Maria Dougan, Margaret Furlong

**Proceedings of the 2nd International and Interdisciplinary Conference on Image and Imagination** Enrico Cicalò, 2020-03-17 This book gathers peer-reviewed papers presented at the 1st International and Interdisciplinary Conference on Image and Imagination (IMG 2019), held in Alghero, Italy, in July 2019. Highlighting interdisciplinary and multi-disciplinary research concerning graphics science and education, the papers address theoretical research as well as applications, including education, in several fields of science, technology and art. Mainly focusing on graphics for communication, visualization, description and storytelling, and for learning and thought construction, the book provides architects, engineers, computer scientists, and designers with the latest advances in the field, particularly in the context of science, arts and education.

The Architecture of Modern Italy Terry Kirk, 2005-06-02 “Modern Italy” may sound like an oxymoron. For Western civilization, Italian culture represents the classical past and the continuity of canonical tradition, while modernity is understood in contrary terms of rupture and rapid innovation. Charting the evolution of a culture renowned for its historical past into the 10 modern era challenges our understanding of both the resilience of tradition and the elasticity of modernity. We have a tendency when imagining Italy to look to a rather distant and definitely premodern setting. The ancient forum, medieval cloisters, baroque piazzas, and papal palaces constitute our ideal itinerary of Italian civilization. The Campo of Siena, Saint Peter's, all of Venice and San Gimignano satisfy us with their seemingly unbroken panoramas onto historical moments untouched by time; but elsewhere modern intrusions alter and obstruct the view to the landscapes of our expectations. As seasonal tourist or seasoned historian, we edit the encroachments time and change have wrought on our image of Italy. The learning of history is always a complex task, one that in the Italian environment is complicated by the changes wrought everywhere over the past 250 years. Culture on the peninsula continues to evolve with characteristic vibrancy. Italy is not a museum. To think of it as such—as a disorganized yet phenomenally rich museum unchanging in its exhibits—is to misunderstand the nature of the Italian cultural condition and the writing of history itself.

Italian Modernisms Sergio Poretti, 2015-02-17 T00:00:00+01:00 The studies in this book focus on Italian twentieth-century architecture, in particular design and construction techniques. The descriptions of the worksites and building processes provide a much better and clearer picture of the different modernist styles that existed in Italy; they also reveal the

'thin red line' that characterised an univocal construction method: mixed masonry enriched (and not replaced) by reinforced concrete – a technique well suited to small artisanal worksites. This was a mild version of modern construction, in line with the role construction played in slowing down an industrialisation process which in Italy was, in itself, slow. Each chapter illustrates a specific aspect of the history of construction and highlights several new issues involving architecture in general: the important tectonic similarities which one way or another link the Littorio style and the several different kinds of rationalisms in the thirties; the continuity between the autarchic experimentation and the techniques used in reconstruction; the connection between the large-scale works designed by engineers and the architectures of the fifties and sixties, which now appear to be one of the mainstays of the unique Italian Style.

*Spatial Recall* Marc Treib,2013-09-13 Architecture and designed landscapes serve as grand mnemonic devices that record and transmit vital aspects of culture and history. *Spatial Recall* casts a broad net over the concept of memory and gives a variety of perspectives from twelve internationally noted scholars, practicing designers, and artists such as Juhani Pallasmaa, Adriaan Geuze, Susan Schwartzberg, Georges Descombes and Esther da Costa Meyer. Essays range from broad topics of message and audience to specific ones of landscape production. Beautifully illustrated, *Spatial Recall* is a comprehensive view of memory in the built environment, how we have read it in the past, and how we can create it in the future. Please note this book is now printed digitally.

**MAXXI Architettura. Catalogo delle Collezioni** Margherita Guccione, 2017-05-04 Il volume documenta gli autori e le opere delle collezioni di architettura che sono frutto di concorsi, committenze e dei diversi progetti culturali prodotti dal MAXXI Architettura dal 2001 al 2017. L'edizione aggiornata e integrata, in formato digitale, rende conto anche delle oltre venti acquisizioni che hanno arricchito tra il 2015 e il 2017 il patrimonio museale. Il Catalogo è al tempo stesso un agile strumento di riferimento per studiosi e ricercatori, ma anche una sintesi densa e significativa della produzione architettonica contemporanea che il museo mette a disposizione del pubblico per rafforzare l'intrinseco rapporto tra collezioni, ricerca e mostre che è l'aspetto fondamentale della sua identità. I materiali relativi agli 85 autori in collezione raccolti in questi anni sono lo specchio fedele di un'attività su più fronti - dalla conservazione all'esposizione, dalla ricerca alla comunicazione, dalla produzione alla documentazione - condotta con un unico fine: realizzare il primo museo italiano di architettura.
