**Nothing Ventured, Nothing Gained** Phoebe Darqueling, 2020-08-27 There are many types of monsters; Vi just hopes she isn't one of them. Now that medium and con woman Viola Thorne has been flushed out of hiding, she must dodge old marks and protect new allies while grappling with her ever-growing psychic abilities. On her way south to root out the clandestine organization that murdered her partner, she and her traveling companions (both living and dead) are drawn into a mystery surrounding a burlesque troupe aboard an old flame's steamship. To get close to the suspects, Vi joins the show and is thrust back into the spotlight. Solving this case might be her next step toward redemption, but both mundane and supernatural forces are working against her at every turn. All aboard for wily women, fractured friendships, and ghosts galore in this paranormal adventure down the mighty Mississippi.

**Evolutionary Syntax** Ljiljana Progovac, 2015 In this book, Ljiljana Progovac proposes a gradualist, adaptationist approach to the evolution of syntax, subject to natural selection. She provides a specific framework for its study, combining

the fields of evolutionary biology, theoretical syntax, typology, neuroscience, and genetics. The author pursues an internal reconstruction of the stages of grammar based on the syntactic theory associated with Chomskyan Minimalism and arrives at specific, testable hypotheses, which are then corroborated by an abundance of theoretically analysed 'living fossils' drawn from a variety of languages. Her approach demonstrates that these fossil structures do not just coexist alongside more modern structures, but are in fact built into the very foundation of more complex structures, leading to quirks and complexities that are suggestive of a gradualist evolutionary scenario. By reconstructing a particular path along which syntax evolved, Evolutionary Syntax sheds light on the crucial properties of language design itself, as well as on the major parameters of crosslinguistic variation. As a result, this reconstruction can be meaningfully correlated with both the hominin timeline and the ever-growing body of genetic evidence that is available.
