Metaphors of ANGER across Languages: Universality and Variation Zoltan Kövecses, Réka Benczes, Veronika Szelid, 2024-11-04 Anger is one of the basic emotions of human emotional experience, informing and guiding many of our choices and actions. Although it has received considerable scholarly attention in a number of disciplines, including linguistics, a basic question has still remained unresolved: why do variations in the folk model of anger exist across languages if it is indeed a basic emotion rooted in largely universal bodily experience? By drawing on a wide selection of comparable linguistic data from dozens of languages (including a number of less-researched languages), this volume provides the most comprehensive account of what is universal and what is variable in the folk model of anger – and why. It also investigates the role that metonymies might play in the emergence of anger-related metaphors and in what ways context influences or shapes anger metaphors and thereby the resulting folk model of anger. No such volume exists in the (cognitive) linguistic literature on anger – or on emotions for that matter. The book is thus an essential contribution to the study of anger and will serve as basic reading for any researcher interested in how the conceptualization of anger is constructed via the interplay of bodily experience, language and the larger cultural context.

Cannabis Growing Guide J. B. Haze, 2023-03-14 Haze begins his book with an important explanation about genetics and why growers should care about them, both from a practical standpoint and as a hobbyist, highlighting the joy of growing alongside technical knowledge. That same enthusiasm carries into the next section as Haze discusses the importance of the

growing environment. An exploration of the history of cross-breeding strains precedes a discussion of the different attributes that growers may want to cultivate in their own strains. Logically following the discussion of genetics, Haze guides readers through selecting seeds and explains the difference between a Haze plant and a Kush plant. He then continues his discussion of seeds by explaining what makes a good seed and a solid starting point for one's growing adventure. Haze acknowledges that not everyone is lucky enough to live in an environment perfect for growing marijuana and may need some pointers on how to select the seeds and strains that will provide the best possible result in whichever environment readers may reside. He explains the different types of seeds growers can buy, their pros and cons, and provides seed bank recommendations so that readers will know both what they want and where to get it. With all the seed information squared away, Haze moves on to discussing soil. Soil may seem an unusual point of focus, isn't it just dirt? But Haze proves through his thorough explanation that soil is paramount to getting the best yield. His method of versatile pot assembly provides insulation, nutrients, and water to marijuana plants for weeks at a time, making it easier for growers to get the results they want. The author leads readers through preparing the pots and soil for planting, exposes the surprising dangers of chemicals in water and teaches readers how to filter them out, and discusses how to balance the pH of the soil. Haze continues his in-depth descriptions as he guides readers through the various other obstacles of the germination process, such as controlling temperature and moisture without disturbing the seeds or stunting growth. His method of watering the seeds is particularly helpful to beginners, as a frequent slip-up is to dehydrate the seeds as they try to get moisture when using the traditional paper towel technique. Haze's alternative technique allows excited growers to easily observe seeds as they germinate without causing a shake-up and uses easily-obtainable materials and has a 99% success rate. With the beginning stages out of the way, Haze coaches readers through the first growth, plant puberty if you will. He discusses the proper way to pot the seed and the best lighting set up so readers can look forward to the joy of seeing those first little leaves. Haze also explains how to inoculate against pests, an ingenious way of preventing pests from pestering plants. Even if pests do make it to the plants, Haze has a way of dealing with them that will save any plants that have been accosted by unwelcome guests. He also takes care to mention the potential dangers of sharing your growing location with other people as they may inadvertently cause some chaos, and cautions readers to take the safety of their plants seriously. Haze generously shares his surefire method of cloning, one of the most important pieces of information for growers who have found their perfect combination of attributes. Haze demystifies the process and explains it in simple terms that makes the whole operation seem less intimidating than the serious-sounding name implies. He goes on to distinguish the difference between a bud and a flower, demonstrates how to calibrate a bud to get the preferred medicinal effects, and explains how to determine the best time to harvest a plant. After writing a full book on the topic, Haze's chapter on regeneration is as thorough and nuanced as it can be. From explanations of how the process works to how to use tipping in order to increase yield, everything is laid out in a

way that is both detailed and easy to understand. Haze also provides a specific timeline for when to expect results so that no one is left guessing about when to expect success. The author also uses his years of growing experience to help readers auto-dry their crop to perfection, and provides tips on how to minimize handling the plants in order to avoid damaging them and ruining the harvest. With over 150 dazzling photographs by the author and easy-to-implement instructions, (Title) is the perfect book for anyone looking to update their growing methodology and get the best buds possible. Full of sage advice and charming personality, this book is what old-fashioned growers and newbies alike need to read in order to keep growing marijuana fun and fruitful.

The Silver Bullet Solution James E. Gierach,2023-11-21 What's been missing the past 30-years that prevented voters and leaders from hearing or acting upon the Gierach call —and the Civil Society call—for legalized, controlled and regulated drugs and drug markets? Why the public repulsion from the Silver Bullet Solution to the many-tentacled, drug-prohibition monster? Have you lost a child to fentanyl or heroin overdose?Are you worried about losing a loved one to drug addiction or drug accident?Is your neighborhood threatened by violent crime and gangs?Is it safe for your child to get to school, go to the

park, or play outside? Do you live in a safe, suburban neighborhood but yet feel like you need a firearm to be safe in your own home, car, or traveling on a big-city expressway? Do you believe the World War on Drugs (62 years old) has been a dismal failure and ongoing drug seizures by the ton are evidence of that failure? Regardless of color, does it anger you that Blacks, Latinos, and poor Whites are sitting in American prisons for drug crimes at disparate rates? Did you know that drug prohibition causes needless bullet-holes and that bullet-hole healthcare greatly contributes to an unaffordable healthcare system—whether called Obamacare, Trumpcare or Single-Payer? This book offers answers to these challenges, and it broadcasts the idea that there is something YOU CAN DO about it. You can help the new public opinion evolve.
