Building the Spatial University Steven M. Manson, Len Kne, Brittany Krzyzanowski, Jane Lindelof, 2022-02-23 This volume discusses the concept of The Spatial University as part of the broad growth of spatial science and the need for spatial infrastructure in colleges and universities. The book centers on the development of U-Spatial, the spatial science infrastructure at the University of Minnesota that offers a range of spatial activities and services, including data access, training, and community building. Against a backdrop of the changing nature of research, teaching, and service in higher education, the story of U-Spatial anchors a broader discussion of what it means to be a spatial university. This narrative framing demonstrates—with specific examples—the importance of institutions offering dedicated spatial research infrastructure. In six chapters, the text explores the importance of spatial thinking, learning, and research for student and researcher success. The volume offers lessons that are applicable far beyond the University of Minnesota to apply to a broad array of domains and institutional specializations. The book will be useful to students, researchers, and policymakers concerned with how institutions can encourage spatial research, teaching, and service. It will also appeal to researchers and practitioners interested in broader uses of spatial science. This book shows how GIS can transform a university, speaking to the need for leadership in higher education around the power of bringing everything together using spatial and geographic concepts. Tipologías de regiones en la Unión Europea y otros estudios José Luis Luzón Benedicto, 2014-03-03 Esta obra recoge una miscelánea de artículos de autores españoles y brasileños sobre desarrollo regional que demuestran que, en este aspecto, las experiencias de ambos países son cada vez más semejantes. Aunque el sistema socioeconómico imperante se basa en postulados neoliberales, con una disminución del papel de los estados en las tendencias del desarrollo, todavía perviven políticas regionales subsidiadas con fondos públicos que se resisten a desaparecer. Esta aseveración es válida tanto para

España como para Brasil y puede aplicarse, en general, a toda Europa y América Latina. Medamérica, desde su fundación hace ya veinte años, ha tenido como objetivo tender puentes académicos entre Barcelona y América Latina mediante la publicación de libros, la organización de seminarios internacionales, la creación de convenios entre la Universidad de Barcelona y diversas instituciones de Brasil y México, y la realización de más de treinta tesis de doctorado.

Encyclopedia of Christian Education George Thomas Kurian, Mark A. Lamport, 2015-05-07 Christianity regards teaching as one of the most foundational and critically sustaining ministries of the Church. As a result, Christian education remains one of the largest and oldest continuously functioning educational systems in the world, comprising both formal day schools and higher education institutions as well as informal church study groups and parachurch ministries in more than 140 countries. In *The Encyclopedia of Christian Education*, contributors explore the many facets of Christian education in terms of its impact on curriculum, literacy, teacher training, outcomes, and professional standards. This encyclopedia is the first reference work devoted exclusively to chronicling the unique history of Christian education across the globe, illustrating how Christian educators pioneered such educational institutions and reforms as universal literacy, home schooling, Sunday schools, women's education, graded schools, compulsory education of the deaf and blind, and kindergarten. With an editorial advisory board of more than 30 distinguished scholars and five consulting editors, *The Encyclopedia of Christian Education* contains more than 1,200 entries by 400 contributors from 75 countries. These volumes covers a vast range of topics from Christian education: History spanning from the church's founding through the Middle Ages to the modern day Denominational and institutional profiles Intellectual traditions in Christian education Biblical and theological frameworks, curricula, missions, adolescent and higher education, theological training, and Christian pedagogy Biographies of distinguished Christian educators This work is ideal for scholars of both the history of Christianity and education, as well as researchers and students of contemporary Christianity and modern religious education.

Going Wireless Amy C. Kimme Hea, 2009 *Going Wireless* is the first edited collection on wireless and mobile technologies in the field of rhetoric and composition. The contributors offer rhetoric and composition teachers, scholars, and administrators a range of practical and theoretical insights on wireless and mobile technologies. This collection serves as a resource for theoretical explorations on wireless and mobile technology use as it relates to computer and composition teaching and research and acts as a reference for those in the rhetoric and composition community charged with the responsibilities of integrating, supervising, and evaluating wireless and mobile technologies. *Going Wireless* is organized into five major sections and an appendix of key mobile and wireless technology terms. In each section, authors represent a range of perspectives as they articulate the roles of students, teachers, administrators, and researchers working with and through

mobile and wireless devices. The book provides readers with ways to understand the influence of wireless and mobile technologies by critiquing the corporate and IT perspectives that inform mobile and wireless development and integration and seeking out new tropes for learning, teaching, and researching. Drawing on interviews and surveys, rhetorical analyses, and theoretical explorations of wireless and mobile devices, the authors enact a range of methodologies to make claims for reflective approaches to research and teaching with wireless and mobile devices. The contributors share their perspectives on the impact of these technological shifts and situate their experiences in relationship to rhetoric and composition as a field.
