Democracy's Education Harry C. Boyte,2021-04-30 Today Americans feel powerless in the face of problems on every front. Such feelings are acute in higher education, where educators are experiencing an avalanche of changes: cost cutting, new technologies, and demands that higher education be narrowly geared to the needs of today's workplace. College graduates face mounting debt and uncertain job prospects, and worry about a coarsening of the mass culture and the erosion of authentic human relationships. Higher education is increasingly seen, and often portrays itself, as a ticket to individual success--a private good, not a public one. *Democracy's Education* grows from the American Commonwealth Partnership, a year-long project to revitalize the democratic narrative of higher education that began with an invitation to Harry Boyte from the White House to put together a coalition aimed at strengthening higher education as a public good. The project was launched at the beginning of 2012 to mark the 150th anniversary of the Morrill Act, which created land grant colleges. Beginning with an essay by Harry C. Boyte, *Reinventing Citizenship as Public Work*, which challenges educators and their partners to claim their power to shape the story of higher education and the civic careers of students, the collection brings world-famous scholars, senior government officials, and university presidents together with faculty, students, staff, community organizers, and intellectuals from across the United States and South Africa and Japan. Contributors describe many constructive responses to change already taking place in different kinds of institutions, and present cutting-edge ideas like civic science, civic studies, citizen professionalism, and citizen alumni. Authors detail practical approaches to making change, from new faculty and student roles to changes in curriculum and student life and strategies for everyday citizen empowerment. Overall, the work develops a democratic story of education urgently needed to address today's challenges, from climate change to growing inequality.

*Rudolf Steiner* Heiner Ullrich,2014-10-23 Rudolf Steiner is one of the most controversially judged educational reformers of the twentieth century. Although he received little recognition within his field, his educational thought has had a sustained and profound influence, not only in the development of the Waldorf Schools, but also in healing, socially therapeutic work,

psychosomatic medicine, biological-dynamic agriculture, corporate organisation, fine arts, and architecture. Heiner Ullrich paints a concise and well-grounded portrait of the creator of the anthroposophic doctrine and Waldorf pedagogy. The text describes a wide arc from the intellectual biography of Rudolf Steiner, across his basic ideas on human development and education, to include discussion of the organisation, curriculum, methods and success of the Waldorf Schools.

**Learning Strategies for Sustainable Organisations** Bryan Hopkins,2022-05-04 Learning Strategies for Sustainable Organisations explores sustainability in the context of organisational practice and its implications for learning. Based on a systems thinking approach, it provides a thorough grounding in the principles of systems thinking and tools that can be used to help implement sustainability-focused learning strategies. Increasingly, organisations are recognising the importance of adapting their practices to become more sustainable. Drawing on the Agenda 2030 Sustainable Development Goals as a framework, new knowledge, skills and attitudes are required to help provide products and services that align with changing social and ecological environments and better serve the communities of which they are a part. This book is a practical guide showing how to facilitate sustainability learning and development within organisations, explaining how to identify gaps in current practice, take into account different contexts and perspectives about what sustainability means, and evaluate results following implementation. Learning resources include chapter summaries, illustrations, reflection points, mind maps and further reading. Written by an independent performance and learning consultant with extensive experience working with international organisations, this book provides a necessary toolkit for human resource development directors, training managers, chief sustainability officers and management consultants specialising in sustainable development.
