Perfume Engineering Miguel A Teixeira, Oscar Rodriguez, Paula Gomes, Vera Mata, Alirio Rodrigues, 2012-12-31 Perfume Engineering is a must-have reference for engineers who design any products that require fragrances, such as perfumes, cosmetics, healthcare and cleaning products. This book provides the reader with practical guidance on perfume design, performance and classification, from its beginnings as a liquid mixture to the vapour phase, by way of odorant dispersion and olfactory perception. It does this through the application of development and validation models to account for fragrance evaporation, propagation and perception.

The Social Life of Materials Adam Drazin, Susanne Küchler, 2020-06-08 Materials play a central role in society. Beyond the physical and chemical properties of materials, their cultural properties have often been overlooked in anthropological studies: finished products have been perceived as 'social' yet the materials which comprise them are considered 'raw' or natural'. The Social Life of Materials proposes a new perspective in this interdisciplinary field. Diverting attention from the consumption of objects, the book looks towards the properties of materials and how these exist through many transformations in a variety of cultural contexts. Human societies have always worked with materials. However, the customs and traditions surrounding this differ according to the place, the time and the material itself. Whether or not the material is man-made, materials are defined by social intervention. Today, these constitute one of the most exciting areas of global scientific research and innovation, harboring the potential to act as key vehicles of change in the world. But this 'materials revolution' has complex social implications. Smart materials are designed to anticipate our actions and needs, yet we are increasingly unable to apprehend the composite materials which comprise new products. Bringing together ethnographic studies of cultures from around the world, this collection explores the significance of materials by moving beyond questions of what may be created from them. Instead, the text argues that the materials themselves represent a shifting ground around which relationships, identities and powers are constantly formed and dissolved in the act of making and remaking.

The Anthropology of Smell Mojca Ramšak, 2024-08-12 This book discusses the meaning of smell from a socio-cultural perspective and brings important considerations of smell and olfaction beyond anatomy and physiology in an erudite, reader-friendly style. It addresses ideas about smell and odor in culturally diverse contexts; pays attention to the subtle ways in which smell is expressed; treats smell as part of memory, prejudice, rumor, and sexuality; offers insights into the role of

smell in religion, literature, film art, intangible cultural heritage, and museum practices, with particular attention to the challenges posed by historical smells; describes the legal regulation of smell and the background to scent marketing that seeks to influence consumer buying habits, adding a unique and practical dimension to the content. In addition to philosophical and medical historical aspects, the book offers insights into the evolution, diagnosis and impact of the COVID-19 pandemic on the human sense of smell and illustrates how our environment and societal influences shape our sensory perceptions and thus our attitudes and interpretation of the olfactory world around us. From an anthropological perspective, the book looks at olfactory heritage, cultural traditions, and the symbolism of the nose in different societies. Overall, it offers a comprehensive and thought-provoking cultural examination of the sense of smell — a sense that is often underestimated — while broadening our understanding of the world of smell and its role in our lives. “Ramšak’s research provides valuable insights into the relationship between smell and culture, including its influence on identity, memory, social interactions, cultural practices, and beliefs. The book is a valuable resource for sensory anthropology, olfactory and intangible heritage.” Prof. Dr. Katja Hrobat Virloget, University of Primorska, The Faculty of Humanities, Department of Anthropology and Cultural Studies, Koper, Slovenia “The remarkable depth and breadth of the subtle connection between smell and culture is testament to Ramšak’s deep engagement with the subject and her exceptional understanding of the global patterns of cultural connotations associated with smell.” Prof. Dr. Sophie Elpers, The Royal Netherlands Academy of Arts and Sciences, Meertens Institut, Amsterdam, The Netherlands

Scent-Sational Searches Deborah Worley, 2013-05-10 About the Book (website) If you've ever made the costly mistake of buying a perfume you did not like after you got it home, this is THE book for you. Now you can find out how to search for perfect fragrances. Scent-Sational Searches explores the authors theory that there are basically four blood and personality types that parallel fragrance families. Once you learn how you fit into a Fragrance Wheel, your search becomes easy. No more costly mistakes and a lifetime of fun exploring the fragrance world! The book takes you on a journey to discover why fragrances do not smell the same on friends and family. Over the years her observations to so many different reactions, both good and bad, led her to research the subject and share her findings. Mainly due to customer request. People were fascinated by how personalities could be pegged and guided to a fragrance that works for them. Book also includes: 100 Tips and Questions & Answers. Also- Fav Frangrancier Bios about Coco Chanel, Estee Lauder, Thierry Mugler and Michael Edwards. Each legends in the world of fragrance! The last chapter is homage to Pilot International Clubs and their work to fund raise for brain health. Worleys marketing plans include donating a portion of her profits to assist with club fund raising efforts.

Art Scents Larry Shiner, 2020-02-11 In the last twenty years there has been a marked increase in artists using smells in their works at the same time that scents are being used to accompany plays, films, and music. There is also an increase in

ambient scenting in stores and hotels and leading chefs are adding unusual scents to cuisine. The book explores these olfactory activities and the aesthetic and ethical issues they raise as well as answering the traditional disparagement of the sense of smell by leading intellectuals such as Kant, Darwin, and Freud, drawing on current science, social science, and humanities as well as literature.

Fragrance Adviser 1999 Michael Edwards, 1999 This fragrance guide allows the reader to compare and understand 1900 fragrances. Built around a colour fragrance wheel that is keyed to colour-coded family pages, the text is spiral bound with tabbed pages.
