Biobehavioral Stress Response International Society of Psychoneuroendocrinology. Congress,2004 Papers from a September 2003 meeting provide an opportunity to examine many of the popular assumptions about the biologic components of the stress response that confer distress or are likely to culminate in mental or physical pathology, and to replace these assumptions with findings that suggest a far more complex model of stress. The book draws attention to the lack of uniform biological and behavioral responses to stress, focusing instead on the multifaceted attributes of stressors and individual vulnerability and protective factors.
