**Process Engineering Renewal 2** Éric Schaer, Jean-Claude André, 2020-07-16 Process engineering emerged at the beginning of the 20th Century and has become an essential scientific discipline for the matter and energy processing industries. Its success is incontrovertible, with the exponential increase in techniques and innovations. Rapid advances in new technologies such as artificial intelligence, as well as current societal needs sustainable development, climate change, renewable energy, the environment are developments that must be taken into account in industrial renewal. Process Engineering Renewal 2 focuses on research in process engineering, which is partly overshadowed by the sciences that contribute to its development. The external constraints of this interface science must be seen in relation to conservation, sustainable development, global warming, etc., which are linked to current success and the difficulty of taking risks in research.

**L'architecture normative du réseau internet** Aurélien Bamdè, 2014-08-01 Comment un réseau de la dimension d'internet a-t-il pu être édifié sans maître d'œuvre ? Ses bâtisseurs, de nationalités différentes et donc soumis à des droits différents, ont malgré tout globalement œuvré dans le même sens, ce qui laisse à penser qu'ils ont observé les mêmes normes. Quelles sont ces normes ? Quelle est leur nature ? Peuvent-elles être qualifiées de juridiques ? Sont-elles en contradiction avec le droit des États ?

Un renouveau du génie des procédés 2 Éric Schaer, Jean-Claude André, 2019-11-01 Apparu au début du siècle précédent, le génie des procédés est devenu une discipline scientifique incontournable pour les industries de transformation de la matière et de l'énergie. Son succès ne se dément pas avec l'augmentation exponentielle des techniques et des innovations. Le développement rapide de nouvelles technologies comme l'intelligence artificielle ou de nouveaux besoins sociétaux (développement durable, réchauffement climatique, énergies renouvelables, environnement, etc.) implique des évolutions qui doivent être prises en considération dans le renouveau industriel. Ce second volume s'intéresse aux recherches menées en génie des procédés, partiellement occultées par les sciences qui concourent à son développement. Les contraintes externes de cette science d'interface doivent être mises en regard avec des conservatismes divers, liés au succès actuel et à la difficulté de la prise de risque en recherche.

**Theorizing Fieldwork in the Humanities** Shalini Puri, Debra A. Castillo, 2016-12-13 This volume, the first of its kind, launches a conversation amongst humanities scholars doing fieldwork on the global south. It both offers indispensable tools and demonstrates the value of such work inside and outside of the academy. The contributors reflect upon their experiences of fieldwork, the methods they improvised, their dilemmas and insights, and the ways in which fieldwork shifted their frames of analysis. They explore how to make fieldwork legible to their disciplines and how fieldwork might extend the work of the humanities. The volume is for both those who are already deeply immersed in fieldwork in the humanities and those who are seeking ways to undertake it.

**Musica multiplex** Nicolas Darbon, 2007 La seconde moitié du XX<sup>e</sup> musical a jeté les défenseurs de la Simplicité à l'assaut des combattants de la Complexité. Un courant émerge, vite attaqué pour son néoromantisme : la Neue Einfachheit, alors que la New Complexity signe l'éternel retour du progrès en art... Mais le phénomène est plus général. Il existe dans l'oeuvre musicale une dialogique, c'est-à-dire à la fois un antagonisme et une complémentarité entre l'Un et le Multiple, le Micro et le Macro, le Fini et l'Infini.
