**Robert A. Baker**

Mass Dreams of the Future Chet B. Snow, 1993-03-01

*The Future of Human Experience* J. Zohara Meyerhoff Hieronimus, 2013-07-21 Explores the future predictions of cutting-edge scientists, spiritual teachers, and other visionaries and how we can affect the future • Shares insights from the author's discussions with Dr. Mehmet Oz, Raymond Moody, Larry Dossey, John Perkins, Michael Cremo, Gay Bradshaw, Ray Kurzweil, and many others • Examines what these visionary thinkers foresee for humanity based on current trends in medicine, science, agriculture, history, and other disciplines • Reveals how consciousness affects evolution and Earth's future For almost three decades Zohara Hieronimus has interviewed spiritual teachers, cutting-edge scientists, ancient wisdom keepers, laboratory-tested psychics, and other visionaries on their predictions for the near and far future. While the methods they use are significantly diverse, the similarities in their forecasts are striking. And, as Hieronimus reveals, one common theme resonates through them all: the power of human consciousness. Sharing insights from her discussions with Dr. Mehmet Oz, Raymond Moody, Larry Dossey, John Perkins, Michael Cremo, Gay Bradshaw, Ray Kurzweil, and many others, Hieronimus explores what these visionary thinkers foresee for humanity based on current trends in medicine, science, agriculture, Earth history, robotics, and spirituality. She examines natural, extraterrestrial, and man-made events that dramatically altered humanity's course in the past or might in the future, revealing a recurring cycle of catastrophic Earth changes and rebirths of civilization over billions of years. The author explains that, as part of the energetic expression of Divinity, we can influence the impact of Earth changes through our actions and intentions. She shows that the consciousness of humanity has the power to affect evolution, enact healing on personal and global levels, and alter even natural systems such as the weather. By studying predictions across a broad range of disciplines--from nano-technology to plant intelligence--from today's great minds and from ancient spiritual traditions, Hieronimus shows that we can significantly improve the long-term welfare of the Earth by unfolding our nonlocal consciousness, adopting a reverent attitude toward all life, and realizing how we do things is as vital as what we do.

Future Times Kathryn M. Hilton, 2001-04-06 Through her dreams and visions and those of a few friends, Author Kathryn Hilton reveals the lost Continent of Atlantis and other major earth changes that will occur in the future. Mostly about the U.S.A., there is information about a few other places on the planet. Mt. Fujiyama explodes, destroying the island of Japan,

setting up a chain of reactions around the Pacific. At end of the chain, Mt. McKinley erupts in Alaska, causing a tidal wave that will submerge the state of California and part of neighboring states. In Europe the submerged city of Athenai surfaces in the Mediteranean Sea as the coastline of Greece dramatically increases in size. As the Sea becomes smaller, other areas of land will rise. The island of Atlantis, landlocked for centuries, appears as half of South Carolina and part of North Carolina become submerged. A tidal wave hits New York City, flooding Times Square and most of Manhattan. Seattle is destroyed by a large earthquake and rebuilt. From the East Coast to the West Coast, many states are covered to give an overall view of what will happen to the United States. With the Moon changing position, a planetary quake, and rotation of the planet temporarily stopping, creating darkness over half the Earth, this book gives a comprehensive look at the future of our world. After these disasters have ended, there will be no more for 700 years.

**'City of the Future'** Mateusz Laszczkowski, 2016-08-01 Astana, the capital city of the post-Soviet Kazakhstan, has often been admired for the design and planning of its futuristic cityscape. This anthropological study of the development of the city focuses on every-day practices, official ideologies and representations alongside the memories and dreams of the city's longstanding residents and recent migrants. Critically examining a range of approaches to place and space in anthropology, geography and other disciplines, the book argues for an understanding of space as inextricably material-and-imaginary, and unceasingly dynamic - allowing for a plurality of incompatible pasts and futures materialized in spatial form.

Past Lives Future Lives Jenny Cockell, 1998-04-16 In this compelling account of her memories of past lives and her visions of lives to come, the author of *Across Time and Death* presents a fascinating look at the continuity of past, present, and future.

**Hidden Memories** Robert A. Baker,1996-09 Alien abductions, satanic kidnappings, the channeling of spirits, the recall of past lives and other similar bizarre experiences are reported almost daily in the media. Is there a rational explanation for these events? According to Robert A. Baker, such irregular or supernatural experiences are manifestations of hidden memories, a phenomenon in which experiences that originally make little conscious impression are filed away in the brain and later are suddenly remembered in an altered form. In *Hidden Memories*, the most recent scientific evidence on memory is used to dispel many supernatural beliefs and to show how the boundaries of human behavior are often misperceived by therapists, especially those who adhere to fringe beliefs. He shows how delusions and illusions affect behavior and discusses the role hypnosis, imagination, and suggestion play in the creation of other worldly experiences. Finally, Baker looks at the media's role in aiding and abetting paranormal belief in addition to promoting the growth of superstitions and popular myths.
