None of This Is True Lisa Jewell, 2023-08-08 INSTANT NEW YORK TIMES BESTSELLER From the #1 New York Times bestselling author known for her “superb pacing, twisted characters, and captivating prose” (BuzzFeed), Lisa Jewell returns with a scintillating new psychological thriller about a woman who finds herself the subject of her own popular true crime podcast. Celebrating her forty-fifth birthday at her local pub, popular podcaster Alix Summer crosses paths with an unassuming woman called Josie Fair. Josie, it turns out, is also celebrating her forty-fifth birthday. They are, in fact, birthday twins. A few days later, Alix and Josie bump into each other again, this time outside Alix’s children’s school. Josie has been listening to Alix’s podcasts and thinks she might be an interesting subject for her series. She is, she tells Alix, on the cusp of great changes in her life. Josie’s life appears to be strange and complicated, and although Alix finds her unsettling, she can’t quite resist the temptation to keep making the podcast. Slowly she starts to realize that Josie has been hiding some very dark secrets, and before she knows it, Josie has inveigled her way into Alix’s life—and into her home. But, as quickly as she arrived, Josie disappears. Only then does Alix discover that Josie has left a terrible and terrifying legacy in her wake, and that Alix has become the subject of her own true crime podcast, with her life and her family’s lives under mortal threat. Who is Josie Fair? And what has she done?

Beyond the Basic Stuff with Python Al Sweigart, 2020-12-22 BRIDGE THE GAP BETWEEN NOVICE AND PROFESSIONAL You've completed a basic Python programming tutorial or finished Al Sweigart's bestseller, *Automate the Boring Stuff with Python*. What's the next step toward becoming a capable, confident software developer? Welcome to *Beyond the Basic Stuff with Python*. More than a mere collection of advanced syntax and masterful tips for writing clean code, you'll learn how to advance your Python programming skills by using the command line and other professional tools like code formatters, type checkers, linters, and version control. Sweigart takes you through best practices for setting up your development environment, naming variables, and improving readability, then tackles documentation, organization and performance measurement, as well as object-oriented design and the Big-O algorithm analysis commonly used in coding interviews. The skills you learn will boost your ability to program--not just in Python but in any language. You'll learn: Coding

style, and how to use Python's Black auto-formatting tool for cleaner code
Common sources of bugs, and how to detect them with static analyzers
How to structure the files in your code projects with the Cookiecutter template tool
Functional programming techniques like lambda and higher-order functions
How to profile the speed of your code with Python's built-in `timeit` and `cProfile` modules
The computer science behind Big-O algorithm analysis
How to make your comments and docstrings informative, and how often to write them
How to create classes in object-oriented programming, and why they're used to organize code
Toward the end of the book you'll read a detailed source-code breakdown of two classic command-line games, the Tower of Hanoi (a logic puzzle) and Four-in-a-Row (a two-player tile-dropping game), and a breakdown of how their code follows the book's best practices. You'll test your skills by implementing the program yourself. Of course, no single book can make you a professional software developer. But *Beyond the Basic Stuff with Python* will get you further down that path and make you a better programmer, as you learn to write readable code that's easy to debug and perfectly Pythonic
Requirements: Covers Python 3.6 and higher

The Catechism Explained Francis Spirago,1899 This Catechism is divided into three parts: The first part treats of faith, the second of morals, the third of the means of grace. In the first part Our Lord appears in His character of Teacher; in the second in His character of King; and in the third in His character of High Priest. And since this Catechism proposes as its primary object to answer the question, for what purpose are we here upon earth, thereby emphasizing and giving prominence to man's high calling and destiny, it is especially suited to the present day, when the pursuit of material interests, self-indulgence and pleasure, engrosses the attention of so many. This Catechism is in fact nothing more nor less than an abstract of Our Lord's teaching, and may be called a guide book for the Christian on the road to heaven. - Preface.

Germany's High Sea Fleet In The World War Admiral Reinhard Scheer,2013-01-15 Includes 26 illustrations, battle maps and portraits of the Naval War 1914-1918 Known to his own sailors as the Man with the Iron Mask, Admiral Reinhard Scheer was a hardened dedicated sailor. It was his relentless drive that enabled him to overcome his limited social background and gain the highest rank in the Kaiserliche Marine. His memoirs are of great interest to historians of the First World War and the nascent German 'Great Power' status. Broadly divided into three sections, the first part of his memoirs concentrates on the German Fleet's activities during the first years of the war, including the bombardment of the coast of Britain, which came as such a shock to the Allies. The second, which naturally dominates his memoirs, are his great exploits at the Battle of Jutland or Skaggerak in command of the cruiser squadron which caused such damage to the British Fleet. The third and final part recounts his time as chief of staff of the German Navy, as an advocate of unrestricted Naval Warfare he recounts his lobbying of the Emperor and the methods and experiences of the U-Boats under his command. A thoroughly gripping Naval read. Author — Admiral Reinhard Scheer (1863-1928) Translator — Anon. Text taken, whole and complete, from the edition published in New York [etc.] Cassell and company, ltd., 1920. Original Page Count - xiv and 375 pages.
