Anti-Black Racism in America Thomas F. Pettigrew, 2025 This book presents a fresh, comprehensive look at American Black-White relations. Drawing on his decades of experience at the intersection of social psychology and intergroup relations, Thomas F. Pettigrew demonstrates the advances made in recent years that promise a decline in anti-Black racism--especially in politics and education, but also highlights where American racism remains firmly entrenched--in economics, housing, and the justice system. The book emphasizes the central importance of segregated housing that restrains both interracial contact and the growth of Black-American wealth. It closes with new proposal for Black reparations that could be generated from billionaires alone.

Success Internationally: The Important Dispositions You'll Need for Thriving Abroad Steve Carber, 2015-10-30 What are the dispositions of people who work successfully in an international milieu? This guiding question serves to unify the themes of the book, and each chapter hearkens to it. Sub-questions include how can these dispositions be taught and assessed, both to youth and to adults? This book helps prepare readers for even greater success in international milieus or expatriate assignments. In discussing positive dispositions such as open-mindedness, adaptability, and flexibility, the authors are implicitly addressing self-improvement, though not in the style of a self-help book. The book is forward-minded about preparing today's students, young professionals, and fellow citizens for a world that does not yet exist but that we know will be increasingly international.

Actor-Network Theory and Tourism René van der Duim, Carina Ren, Gunnar Thór Jóhannesson, 2012-03-16 The recent surfacing of actor-network theory (ANT) in tourism studies correlates to a rising interest in understanding tourism as emergent thorough relational practice connecting cultures, natures and technologies in multifarious ways. Despite the widespread application of ANT across the social sciences, no book has dealt with the practical and theoretical implications of using ANT in Tourism research. This is the first book to critically engage with the use of ANT in tourism studies. By doing so, it challenges approaches that have dominated the literature for the last twenty years and casts new light on issues of materiality, ordering and networks in tourism. The book describes the approach, its possibilities and limitations as an ontology and research methodology, and advances its use and research in the field of tourism. The first three chapters of the book introduce ANT and its key conceptual premises, the book itself and the relation between ANT and tourism studies. Using illustrative cases and examples, the subsequent chapters deal with specific subject areas like materiality, risk, mobilities and ordering and show how ANT contributes to tourism studies. This part presents examples and cases which illustrate the use of the approach in a critical way. Inherently, the study of tourism is a multi-disciplinary field of research and that is reflected in the diverse academic backgrounds of the contributing authors to provide a broad post-disciplinary context of ANT in tourism studies. This unique book, focusing on emerging approaches in tourism research, will be of value to students, researchers and academics in tourism as well as the wider Social Sciences.

Heritage Or Heresy Cameron Jean Walker, 2009-01-08 How can we effectively interpret and present one culture to another without stereotypes or over-simplifications? What is the best way to present an authoritative version of a national heritage without also endangering ancient sites or being insensitive to the local customs, beliefs, and religious practices of the indigenous peoples? This volume addresses the ongoing thrust in archaeology to take the next step after preserving the past: interpreting that past for the future. That future audience includes both local citizens and tourists who may have little background in archaeology, anthropology, or the history of the culture featured. Walker presents the key components of the anthropological study of tourism as a global phenomenon, with particular emphasis on the more prominent arguments for how and why tourism is a universal and meaningful human activity. The highly controversial topic of authenticity is examined, with special attention given to how authentic has been defined and how it relates to the ways in which archaeological sites, artifacts, and cultural traditions are presented--or not presented--to the visiting public. The ephemeral promise of "authenticity" drives the heritage tourism industry, which is a key consideration for the long term economy of the Maya Riviera and elsewhere. Through analysis of seven archaeological sites on the Yucatan peninsula that are open to heritage touring, Walker reveals the planned growth of the Maya Riviera since the early 1970s and examines the impact of

international tourism on both ancient structures and the contemporary Maya people and culture.

The Europeans Orlando Figes, 2019-10-08 From the “master of historical narrative” (Financial Times), a dazzling, richly detailed, panoramic work—the first to document the genesis of a continent-wide European culture. The nineteenth century in Europe was a time of unprecedented artistic achievement. It was also the first age of cultural globalization—an epoch when mass communications and high-speed rail travel brought Europe together, overcoming the barriers of nationalism and facilitating the development of a truly European canon of artistic, musical, and literary works. By 1900, the same books were being read across the continent, the same paintings reproduced, the same music played in homes and heard in concert halls, the same operas performed in all the major theatres. Drawing from a wealth of documents, letters, and other archival materials, acclaimed historian Orlando Figes examines the interplay of money and art that made this unification possible. At the center of the book is a poignant love triangle: the Russian writer Ivan Turgenev; the Spanish prima donna Pauline Viardot, with whom Turgenev had a long and intimate relationship; and her husband Louis Viardot, an art critic, theater manager, and republican activist. Together, Turgenev and the Viardots acted as a kind of European cultural exchange—they either knew or crossed paths with Delacroix, Berlioz, Chopin, Brahms, Liszt, the Schumanns, Hugo, Flaubert, Dickens, and Dostoyevsky, among many other towering figures. As Figes observes, nearly all of civilization’s great advances have come during periods of heightened cosmopolitanism—when people, ideas, and artistic creations circulate freely between nations. Vivid and insightful, *The Europeans* shows how such cosmopolitan ferment shaped artistic traditions that came to dominate world culture.

Global West, American Frontier David M. Wrobel, 2013-10-15 This book examines how travel writers viewed the American West from the age of Manifest Destiny through the Great Depression. In the nineteenth century, the West was often presented as one developing frontier among many; in the twentieth century, travel writers often searched for American frontier distinctiveness--Provided by publisher--Provided by publisher.

German-American relations and cross-cultural experiences from the perspective of high school students' host families in the USA Jonas Heidger, 2017-01-11 Bachelor Thesis from the year 2016 in the subject American Studies - Culture and Applied Geography, grade: 1,0, Johannes Gutenberg University Mainz, language: English, abstract: Cross-cultural exchanges serve the purpose of contributing to a cultural understanding, broadening the horizon and more. This leads to the understanding that two individuals with respective cultures encounter each other and explain their cultural peculiarities, meaning they will therefore benefit from the experience. This however presents a rather static understanding of culture, as it implies that each exchange is successful and goes without a problem. A successful exchange for hosts and exchange students relies on various factors such as tolerance, interest and adjustment on both sides, as two different cultures meet. The diversity of cultural theories has resulted from these factors, which have to be considered in order to

resolve cultural misunderstandings and establish a relationship. In this paper, the focus will be on German-American relations through the lens of student exchanges in a High School setting and focus on the culture exchange and development of a relationship between the exchange students and their host families. The majority of the literature found as regard student exchanges concentrates on the students' perspective as to sharing their experiences and gain throughout this experience. Equally, previous interviews with host families focused on the exchange students' gain and their learning process. To enable a deeper understanding of the way in which an exchange student and his culture are being perceived by the host family, it is necessary to change the perspective in order to reflect the host families' experiences. To implement this project, it is necessary to respond to the culture term and its elements regarding student exchanges. Interviews with four former host families have been conducted to realize this. Those findings are going to build the foundation of my study. Throughout the interview, the focus was on how the families perceived their students and what roles were assigned to them. As both parties bring different perceptions of their counterparts' origin to the table, there will be an accumulation of multifaceted expectations as regards each member of this adventure and, of course, misunderstandings.

The Meaning of International Experience for Schools Angene H. Wilson, 1993-07-28 Angene Hopkins Wilson presents case studies which illustrate how internationally experienced persons—including teachers who have travelled and lived abroad, returned Peace Corps volunteer teachers, and immigrant and international students—contribute to the curriculum in their schools. In an affluent suburban elementary school, an impoverished rural middle school, and an inner-city magnet high school program, Wilson examines how school systems, teacher education programs, and communities can cooperate in efforts to provide social education with a global perspective. She discusses problems such as the ambivalence of school culture towards international experience and the tension between cultural loyalty and world citizenship, offers a model explaining the impact of international experience and makes specific suggestions for using international experience more fully in the schools.

Interpretation of Cultural and Natural Resources Douglas M. Knudson, Ted T. Cable, Larry Beck, 2003 This text explains cultural and natural environments and how to process information for the public in museums, parks, forests, and many other private and public interpretive agencies worldwide. Based in research and theory, this book defines, affirms, and unifies this diverse field for both professionals and students by presenting the challenges and possibilities of the field including the presentation of interpretation to diverse audiences; effective programming strategies; state-of-the-art management and marketing techniques; training and using volunteers; and the trends facing interpretation today and in the future.
