E Durkheim

Bionics and Sustainable Design Felipe Luis Palombini, Subramanian Senthilkannan Muthu, 2022-05-24 This book includes both theoretical conceptualization and practical applications in the fields of product design, architecture, engineering, and materials. The book aimed to inspire scholars and professionals to look at nature as a source of inspiration for developing new project solutions. Moreover, being one of the literature's first direct associations of bionics with sustainability, the book can be used as a reference for those who seek to know more about the theory of bioinspired applications, as well as new technologies, methods, materials, and processes.

¿Evasión o expulsión? María del Carmen Parrino, 2014-01-01 Este libro expone uno de los problemas más acuciantes de la universidad actual: la pérdida de sus estudiantes. La matrícula crece año a año, pero los jóvenes abandonan los cursos al poco tiempo de iniciarlos. La deserción desnuda no sólo los problemas individuales de los estudiantes para hacer frente a la carrera, sino también dificultades institucionales y sociales en relación con la permanencia. La obra propone abordar la problemática desde una perspectiva holística revisando las diferentes dimensiones involucradas a fin de descubrir las causas y los procesos intervinientes en el fenómeno. Las consecuencias son importantes para el joven y su familia, pero también representan un derroche de recursos para las instituciones y la sociedad en su conjunto. La autora profundiza la mirada abordando problemáticas relativas a la universidad y al sujeto. Los adultos, en particular, los padres y profesores, debemos cimentar la educación de las generaciones futuras. No es suficiente con promover la asistencia a la universidad, ya que ni la gratuidad ni el acceso directo aseguran la permanencia. Es necesario pensar nuevas estrategias que aporten soluciones para lograr una trayectoria educativa continua que consolide la graduación. Así, este libro propone un cambio de perspectiva con miras a un nuevo paradigma inclusivo.

La universidad argentina en tránsito Marcela Mollis, 2001 Reunión de ensayos que perciben los modelos de educación superior en una crisis profunda. la autora rebasa la especificidad del sistema de educación superior en Argentina al situarlo en el contexto de las tendencias mercadotécnicas que la globalización, a través del Fondo Monetario Internacional y del Banco Mundial, impone a naciones tan distantes y cercanas como Hungría, México o Brasil.

Reverse Engineering of Ancient Metals Patricia Silvana Carrizo,2022-01-01 This book examines archaeometallurgy and the preservation of ancient materials for cultural heritage. Through understanding the internal structures of relevant ancient materials, their chemical composition, resistance, hardness, etc., their conservation can be more effectively addressed. Preserving cultural artifacts, such as those from border sites, funerary contexts (burials), railway lines, ceremonial sites and road infrastructure, is necessary to provide perspective to a culture's trajectory. This book addresses how Reverse Engineering can disseminate knowledge of a culture's heritage by offering technology that can help restore artifacts so they may be displayed and utilized as educational objects.
