La administración y el control de la calidad James R. Evans,William M. Lindsay,1999-09 Evans/Lindsay is a market leader in the TQM field. James Evans, a well-known author, is the current president of the Decision Sciences Institute. With his past experience as an examiner for the Malcolm Baldrige Award, the entire book is heavily influenced by the framework and essential content of the Malcolm Baldrige National Quality Award criteria. The authors believe the principles of total quality, as reflected in the Baldrige Award, provide the best overall synthesis of the concept of quality. Management and Control of Quality presents an up-to-date, managerially-oriented, integrated view of quality management while also blending in a variety of technical topics.

Administración y control de la calidad James Evans,James R. Evans,2005 Esta obra hace un análisis amplio del método Six Sigma (creado y registrado por Motorola). Sin embargo, los autores consideraron seguir con el enfoque de utilizar el premio Malcom Baldrige a la calidad como el marco de referencia para exponer todos los temas.

Introducción a la Gestión de Calidad ,2007 En este libro se han incluido numerosos casos de empresas multinacionales que permiten acercarse a la gestión de la calidad, así como tener en cuenta el factor medioambiental como un elemento más en la gestión de la calidad en las organizaciones.

Management Information Systems Kenneth C. Laudon,Jane Price Laudon,2004 Management Information Systems provides comprehensive and integrative coverage of essential new technologies, information system applications, and their impact on business models and managerial decision-making in an exciting and interactive manner. The twelfth edition focuses on the major changes that have been made in information technology over the past two years, and includes new opening, closing, and Interactive Session cases.

Gerencia de compras - 2da edición Nohora Ligia Heredia Viveros,2013-01-01 Esta edición actualizada está enriquecida con nuevos enfoques globales en áreas como: la importancia de la función de compras; el CIIU, sus características, manejos y aplicaciones; indicadores de Gestión en Cadena de Suministros (SMC); la ampliación en el contexto de aseguramiento de los procesos de calidad, incorporando al paquete básico de las ISO 9000, 14000, 18000, 22000, 26000 y 27000. El impresionante desarrollo de la sociedad del conocimiento reflejada en procesos globalizadores e integradores lleva a las empresas actuales a marcar sus pasos de desarrollo a ritmos mucho más acelerados cuya imperiosa necesidad de incorporar temas como los aquí descritos, encaminan a los gerentes y/o directores de adquisiciones o suministros a contemplar unas mayores responsabilidades organizacionales. Debido a esto, es importante incorporar la temática de la Cadena de Suministros (SCM) actualmente conocida como la Red de Suministros, donde se establecen los lazos fundamentales con la acción propia de la Gestión de Compras, sumada al manejo y administración de inventarios que, con el valioso aporte del Dr. Víctor Jaime García, logra un planteamiento general bastante estructurado en lo relacionado con esta área básica en las organizaciones pasadas, actuales y futuras.

Gestión integral de la calidad basada en procesos ELKIN DARÍO DÁVILA,2022-12-06 La propuesta básica plantea la necesidad de gestionar las organizaciones de manera integral considerando un modelo administrativo cuyos componentes están interrelacionados, alineados en un propósito común de la empresa, como es garantizar y maximizar las necesidades, demandas y expectativas del mercado objetivo, a quienes van dirigidos los productos o servicios ofrecidos. Maximizar la satisfacción del cliente significa, además, hacerlo con el menor costo posible. Los temas propuestos son un aporte intelectual a quienes desarrollan de manera cotidiana la labor de mantener en el mercado una organización empresarial en un medio altamente competitivo y exigente del mercado interno y externo. Los componentes del modelo administrativo propuesto son: el direccionamiento estratégico de la organización, la gerencia de los procesos —compuesta a su vez por análisis de procesos, Control Estadístico de Procesos (CEP) y evaluación de procesos— y, como tercer componente, la gerencia de la cultura. Todos estos elementos se gestionan e interactúan sobre la base de la cultura de la calidad integral de la organización, la cual resulta determinante en la sostenibilidad de la misma. En la conjunción de estos elementos en administración de procesos, se obtiene como resultado la gestión integral de calidad basada en procesos.
