Guidelines for Making Pedestrian Crossing Structures Accessible Richard A. Richter,1984 Accessibility for handicapped persons is an important consideration when designing and locating pedestrian over-and undercrossing structures. This manual provides recommendations and design criteria for pedestrian over- and undercrossing structures for elderly and handicapped pedestrians. Maximum ramp grades and distances between resting places needed by persons in wheelchairs are described along with design requirements to accommodate persons with limited vision and those unable to see at all are detailed. In addition, the necessity to consider these structures as a part of a broader network of accessible routes is outlined in this manual.

A Pedestrian Planning Procedures Manual L. S. Kagan,William Gilmore Scott,U. P. Avin,1978 The Manual identifies the significant data, procedures and criteria that should be considered in the planning and evaluation of both comprehensive pedestrian systems and individual facilities. Volume I provides a general background and introduction to pedestrian planning and to the technical procedures of Volume II. Volume II is operational and sequential in nature. Volume III explains the derivation of the data provided in Volume II and presents considerably more detailed data and methodologies for various tasks as well as worked examples.

Handbook of Human Factors and the Older Adult Arthur D. Fisk, Wendy A. Rogers, 1997 Within developed countries, the elderly population--people aged 75 and older--is expanding faster than its younger counterpart. This change in demographics creates a need for understanding ergonomics with respect to the aged user in the design of products, transportation, safety, leisure activity aids, and work and home environments. The Handbook of Human Factors and the Older Adult provides a comprehensive sourcebook for information on the interface of gerontology and ergonomics. The Handbook discusses practical applications, theory, and research in this dynamic area. This book is divided into two sections: Section I covers how the neuropsychology and physiology of aging relates to issues of human factors, while Section II addresses applications of human factor research to the older population and specific environments.
