Paul Bolstad

GIS Fundamentals Paul Bolstad, 2019 New and updated Sixth Edition of GIS Fundamentals, 6th Edition - the bestselling GIS textbook by Paul Bolstad. Geographic Information Systems (GIS) are computer-based tools for the entry, maintenance, and analysis of spatial data. GIS are critical for effective resource management, and have been applied across a wide range of science, business, and government endeavours. This book provides an introduction to the theory and application of GIS. It is written for use in a first-year GIS class and as a reference for the GIS practitioner. This sixth edition balances theoretical and practical material, so that students may apply knowledge of GIS in the solution of real-world problems. Improvements over the previous editions are included in each chapter. Topics treated include an introduction to GIS, spatial data models, map projections, data entry, image data, GPS, digital data, database systems in GIS, general spatial analysis, raster analysis, terrain modeling, metadata, standards, and accuracy assessments.

Empowering Wheat Cultivation with GIS, Digital Approaches and Artificial Intelligence Nusret Zencirci, Faheem Shehzad Baloch, Jin-Ying Gou, Velimir Mladenov, Sotirios Fragkostefanakis, Marta da Silva Lopes, Ephrem Habyarimana, Hakan Ulukan, Asuman Kaplan Evlice, 2025-11-01 The global population is projected to exceed 9 billion by 2050, leading to imminent food shortages not only for the current but also future generations. Anticipated increases in appetite coming 50 years will pose significant challenges to food production. This demand will exert additional pressure on agriculture for the escalating need for food. On one hand, research indicates a 60% increase in food production is necessary to accommodate the projected 9 billion people, on the other hand, a substantial portion of the population is grappling with various micronutrient deficiencies, such as iron, zinc, iodine, vitamin A, and folic acid, a condition referred to as hidden hunger. Hence, it is imperative to exert substantial efforts towards developing improved cultivars under enhanced technological conditions. Concerns about climate change are anticipated to profoundly affect soil water availability, carbon storage, and crop yields. Droughts in the Mediterranean and Africa are expected to worsen during certain seasons. Each year, climate change leads to substantial losses in agricultural production, with a worsening scenario in the future. Wheat breeding has witnessed significant advancements with the wheat genomics, whole-genome sequencing, high-throughput phenotyping, genome-editing technologies, and marker-assisted breeding. These enable genome-based breeding to produce higher enough yielding by 2050. Speed breeding has a crucial role in the incorporation of new genes into breeding pipelines, facilitating the creation

of innovative homozygous advanced lines, and accelerating the identification and functional characterization of new genes. Climate change and recent technological advancements necessitate efficient utilization of remote sensing, digital tools, and artificial intelligence approaches, have gained prominence in wheat agriculture. This book aims to encompass both past and upcoming research activities in this domain. It serves as a valuable resource for wheat breeders interested in leveraging modern data technologies in their research endeavours.

The Truth about Wuhan Andrew G. Huff, 2022-12-06 Shocking new insider information that shows what really happened in Wuhan, China, at the start of the COVID-19 outbreak and in the ensuing cover-up. The day that Dr. Andrew G. Huff left his senior scientist and vice president role at EcoHealth Alliance was one of the happiest days of his life due to the corruption he had witnessed at the organization. However, he never thought working there would be of any great consequence to the future. He was wrong. Because, as an EcoHealth Alliance insider, Dr. Huff had had a ringside seat to one of the biggest cover-ups in history. The Truth about Wuhan contains new research and a breakdown of how and why the development of COVID-19 in the United States and China was supported by the US government to collect intelligence on laboratories in China. Dr. Huff, an expert in the fields of bioterrorism and bio warfare, is a whistleblower who will show why the reasons the lab leak was covered up are incorrect. He worked on the classified research side of the program as a US government scientist. He knows the real how and why COVID-19 emerged. Besides exposing the conspiracy and cover-up, Dr. Huff also puts forth policy solutions and recommendations to prevent a lab leak virus from plaguing the world again. The Truth about Wuhan simply explains the complexity of the system that led to COVID-19's emergence; how the medical industrial complex grew and became entrenched in gain of function work after 9/11; why EcoHealth Alliance was the (almost) perfect intelligence collection cover; the policy actions and decision-making process as to why the United States government engaged in the COVID cover-up; how and why the United States swapped biotechnology with China and biomedical corporations; and the incentives for each of the actors or governments to engage and coordinate a global cover-up of COVID-19 origins. The Truth about Wuhan also shows how and why Dr. Anthony Fauci is intricately involved in the COVID cover-up; how scientists like EcoHealth Alliance president and CEO Dr. Peter Daszak rose to power and used their influence to corrupt science and the COVID origin investigation; and how the intelligence community likely orchestrated the cover-up with Dr. Anthony Fauci. Dr. Huff also provides personal harrowing accounts of how the US government waged a psychological operation against him to prevent him from speaking out. COVID-19 is the biggest lie, scandal, and intelligence failure in US history, and Dr. Andrew G. Huff is stepping out of the shadows to share his insider story about this failure that led to millions of deaths around the world.

The Role of Humanities in Understanding Society: A Broad Perspective 2025 volume-II Ind Dr. Jyoti Kulshreshtha, Dr. Oinam Sadananda Sing, Dr. Samir Ali, 2025-07-30

Artificial Intelligence Perspective for Smart Cities Vahap Tecim, Sezer Bozkus Kahyaoglu, 2022-11-23 The concept of a smart city is used widely in general; however, it is hard to explain because of the complexity and multidimensionality of this notion. However, the essential qualification for being a smart city is to achieve sustainable social, environmental, and economic development and boost the living standards of society based on Information and Communication Technology (ICT) and Artificial intelligence (AI). AI in smart cities has become an important aspect for cities that face great challenges to make smart decisions for social well-being, particularly cybersecurity and corporate sustainability. In this context, we aim to contribute literature with a value-added approach where various AI applications of smart cities are discussed from a different perspective. First, we start by discussing the conceptual design, modeling, and determination of components for the sustainability of a smart city structure. Since smart cities operate on spatial-based data, it is important to design, operate, and manage smart city elements using Geographical Information Systems (GIS) technologies. Second, we define the structure, type, unit, and functionality of the layers to be placed on the GIS to achieve best practices based on Industry 4.0 components. Transportation is one of the key indicators of smart cities, so it is critical to make transportation in smart cities accessible for different disabled groups by using AI technologies. Third, we demonstrate what kinds of technologies should be used for which disabled groups in different transportation vehicles with specific examples. Finally, we create a discussion platform for processes and sub-processes such as waste management, emergency management, risk management, and data management for establishing smart cities including the financial and ethical aspects.
