Ranking of researchers and scientists in Greece in 2017 according to Google Scholar database Giorgos P.

Kouropoulos, 2017-07-22 Scope: The classification of researchers and scientists in Greece in a unified list based on the citation impact and dissemination level of their scientific work according to Google Scholar database Classification criteria: First criterion is h-index. In the case of equal h-index, the following scientometric indicators are used for the classification. The number of total citations, the i10-index, the total impact factor of scientist, the m-index or m-quotient of scientist. Information resource: The h-index, citations and i10-index derived from the public profiles of researchers in the Google Scholar database. In addition, the calculation of total impact factor and m-index of each researcher is carried out using the data from the Google Scholar database. Methodology: Researchers and scientists accounts in the Google Scholar are detected by official domain names of institutions, universities and other organizations of public and private sector. The institution, university and organization of each researcher is defined by domain of email address that have been validated in the Google Scholar. In the next step, the values of h-index, citations and i10-index are recorded from profiles of researchers. If necessary, the total number of uploaded scientific articles and the dates of first published and last published article of researcher are recorded, these data are required for calculation of total impact factor and m-index of each researcher. In the final step, the classification of all researchers and scientist according to h-index and citations number, i10-index, impact factor and m-index is carried out.

Scientific impact indicators of teaching staff of Greek universities and higher educational institutions for 2017 according to Scopus Giorgos P. Kouropoulos, 2017-12-30 Scope: The classification of the permanent and non-permanent scientific and teaching staff of universities and applied universities – technological educational institutions which belong to the higher education sector in Greece. The classification take place in a single list and is based on the citation impact, bibliometric and other scientometric indicators according to Scopus database. Classification criteria: The first criterion for the classification is h-index indicator. In the case of equal h-index indicator between two or more professors, the following bibliometric indicators will be used for each paper author/professor: The number of total citations, the number of included papers in Scopus platform, the total impact factor, the number of citable papers/documents and finally the λ_c ratio. Information resource:

Information related to the h-index indicator, number of citations, number of indexed articles and number of citable documents, are collected by the individual public profiles of professors in the Scopus platform. In addition, the calculation of total impact factor and λc ratio of each professor is carried out using the data of the Scopus platform. Methodology: The first step includes the search of the names of members of permanent and non permanent teaching staff for each faculty of all universities and higher educational institutions in Greece via their official web pages. The second step consists of two parts. The first part deals with search of the names of each member on the Scopus platform in Latin characters and the second part deals with identification and matching of each Scopus profile with the corresponding member of teaching staff for each faculty. In the third step follows the typing and transfer of numerical values, bibliometric indicators and other data from Scopus platform to the computer file and next the calculation of parameters cd and λc . During the fourth step, the classification process is carried out via Microsoft excel according to the above criteria. In the last fifth step, the real names of professors and authors are masked using a special function of the software, due to personal data purposes. Sampling data: The sampling period varied from 02/08/2017 to 06/12/2017, more analytically see Table 2. Totally, a sample consisting of 8715 members of teaching staff of higher educational institutions was collected according to the above step 1 through 3. Sampling error is equal to $\pm 1.07\%$ in 95% confidence interval. Conclusions: There are 6144 members of permanent and non permanent teaching staff with $h\text{-index} \geq 5$ and totally 8715 members of Greek universities and higher educational institutions with $h\text{-index} \geq 0$. The average h-index for the sample of 6144 members is calculated to $14.8 \pm 0.9\%$ and the average number of citations for the same sample is calculated to $1221 \pm 2.9\%$. The average h-index for the sample of 8715 professors is calculated to $11.1 \pm 0.9\%$ and the average number of citations for the same sample is calculated to $872 \pm 2.9\%$.

Oncogene-Induced Senescence Vassilis G. Gorgoulis,Maria Cavinato,Konstantinos Evangelou,2025-03-13 This volume explores a collection of the most recent experimental approaches for the detection, modelling, characterization, and in-depth computational analysis of the biological phenomenon known as Oncogene-Induced Senescence (OIS). The chapters in this book cover topics such as protocols to study OIS in two-dimensional, three-dimensional, and in vivo (animal and human) settings; analyzing OIS using high-throughput bioinformatics; and discriminate OIS from aging. Published in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step and readily reproducible laboratory protocols, and tips on troubleshooting to avoid known pitfalls. Comprehensive and authoritative, *Oncogene-Induced Senescence: Methods and Protocols* is a valuable resource for basic researchers and clinicians in the oncology field, and a great guide for computational scientists.

Orthodontic Aligner Treatment Theodore Eliades,Athanasios E. Athanasiou,2020-11-13 For almost 20 years, clear aligners have seen growing popularity in addressing patients' demands for orthodontic treatment that is also discreet and esthetically inconspicuous. Especially for the adult patient, these almost invisible systems are in considerable demand. Supported by solid clinical evidence, this new work introduces and discusses all the presently available thermoplastically formed products that apply a predetermined strain to the teeth and jaw, with the goal of correcting malpositioned teeth, while also being esthetically acceptable for the patient. Key Features: More than a dozen contributions by top international experts Includes the most recent guidelines on clinical management with aligners Scientific approach presents evidence from material properties research, forces generated with aligners, and treatment outcome assessments Valuable information on changes in oral microbiota, potential side effects, biocompatibility, and more Orthodontic Aligner Treatment will be welcomed by all orthodontic specialists, as well as graduate students, researchers, and clinical faculty in the field.

Greg N. Gregoriou,2010-05-14 Make the post-meltdown markets work for you, using the unparalleled insight of today's top global investing experts! "This book provides a collection of papers that examine trading execution, technical trading, and trading strategies, as well as algorithms in different markets (equities, forex, fixed income, exchange traded funds, derivatives, and commodities) around the world. This is particularly relevant given the recent explosion in trading volumes." Tarun Chordia, R. Howard Dobbs Chair in Finance, Goizueta Business School, Emory University "This book uses a number of well-respected authors in the area of asset trading. It provides a comprehensive analysis of trading-related issues covering momentum trading, algorithmic trading, the use of technical trading rules, strategies for ETFs, and the role of trading volume." Professor John Cotter, Director of the Centre for Financial Markets, University College Dublin School of Business, University College Dublin "The Handbook of Trading is a good reference tool for both practitioners and academics. The contents cover a wide range of topical issues." Professor Robert McGee, Director of the Center for Accounting, Auditing, and Tax Studies, College of Business Administration, Florida International University About the Book: Given today's market volatility, even the most advanced investors can be unsure of their next move. Rather than rely on one or two individuals who claim general knowledge on any given investing topic, you need the advice of professionals who have spent their entire careers developing real expertise on more focused sectors of the market. The Handbook of Trading is the only book available that provides just that. Greg N. Gregoriou has amassed forty of the world's top academics, researchers, and practitioners who explain how to make today's markets work for you. With this highly technical but ultimately practical guide, you have access to a broad array of trading strategies that will put you light years ahead of the competition—regardless of the state of

the market. From technical analysis and momentum trading to algorithmic and FOREX trading, *The Handbook of Trading* introduces you to techniques and insights never before published, each of which has been rigorously back-tested and analyzed. Chapters include: Performance Leakage and Value Discounts on the Toronto Stock Exchange Lawrence Kryzanowski and Skander Lazrak Trading in Turbulent Markets: Does Momentum Work? Tim A. Herberger and Daniel M. Kohlert Profitability of Technical Trading Rules in an Emerging Market Dimitris Kenourgios and Spyros Papathanasiou Leveraged Exchange-Traded Funds and Their Trading Strategies Narat Charupat The Impact of Algorithmic Trading Models on the Stock Market Ohannes G. Paskelian Applying critical lessons learned from the financial crisis of 2008-2009, the contributors explain how to approach turbulent market environments and adjust your trading methodologies accordingly. *The Handbook of Trading* is the go-to guide for financial professionals seeking profits in today's currency, bond, and stock markets.
