The Proof Stage Stephen Abbott, 2023-07-11 How playwrights from Alfred Jarry and Samuel Beckett to Tom Stoppard and Simon McBurney brought the power of mathematics to life on the stage The discovery of alternate geometries, paradoxes of the infinite, incompleteness, and chaos theory revealed that, despite its reputation for certainty, mathematical truth is not immutable, perfect, or even perfectible. Beginning in the last century, a handful of adventurous playwrights took inspiration from the fractures of modern mathematics to expand their own artistic boundaries. Originating in the early avant-garde, mathematics-infused theater reached a popular apex in Tom Stoppard's 1993 play Arcadia. In The Proof Stage, mathematician Stephen Abbott explores this unlikely collaboration of theater and mathematics. He probes the impact of

mathematics on such influential writers as Alfred Jarry, Samuel Beckett, Bertolt Brecht, and Stoppard, and delves into the life and mathematics of Alan Turing as they are rendered onstage. The result is an unexpected story about the mutually illuminating relationship between proofs and plays—from Euclid and Euripides to Gödel and Godot. Theater is uniquely poised to discover the soulful, human truths embedded in the austere theorems of mathematics, but this is a difficult feat. It took Stoppard twenty-five years of experimenting with the creative possibilities of mathematics before he succeeded in making fractal geometry and chaos theory integral to *Arcadia*'s emotional arc. In addition to charting Stoppard's journey, Abbott examines the post-*Arcadia* wave of ambitious works by Michael Frayn, David Auburn, Simon McBurney, Snoo Wilson, John Mighton, and others. Collectively, these gifted playwrights transform the great philosophical upheavals of mathematics into profound and sometimes poignant revelations about the human journey.

Staging America Christopher Bigsby, 2019-12-12 This book is open access and available on www.bloomsburycollections.com. It is funded by Knowledge Unlatched. Many of the American playwrights who dominated the 20th century are no longer with us: Edward Albee, Arthur Miller, Sam Shepard, Neil Simon, August Wilson and Wendy

Wasserstein. A new generation, whose careers began in this century, has emerged, and done so when the theatre itself, along with the society with which it engages, was changing. Capturing the cultural shifts of 21st-century America, *Staging America* explores the lives and works of 8 award-winning playwrights – including Ayad Akhtar, Stephen Adly Guirgis, Young Jean Lee and Quiara Alglèria Hudes – whose backgrounds reflect the social, religious, sexual and national diversity of American society. Each chapter is devoted to a single playwright and provides an overview of their career, a description and critical evaluation of their work, as well as a sense of their reception. Drawing on primary sources, including the playwrights' own commentaries and notes, and contemporary reviews, Christopher Bigsby enters into a dialogue with plays which are as various as the individuals who generated them. An essential read for theatre scholars and students, *Staging America* is a sharp and landmark study of the contemporary American playwright.

Proof David Auburn, 2001 It focuses on Catherine, a young woman who has spent years caring for her father, Robert, a brilliant mathematician in his youth who was later unable to function without her help. His death has brought into her midst both her sister, Claire, who wants to take Catherine back to New York with her, and Hal, a former student of Catherine's father who hopes to find some hint of Robert's genius among his incoherent scribbles. The passion that Hal feels for math both moves and angers Catherine, who, in her exhaustion, is torn between missing her father and resenting the great sacrifices she made for him. For Catherine has inherited at least a part of her father's brilliance -- and perhaps some of his instability as well. As she and Hal become attracted to each other, they push at the edges of each other's knowledge, considering not only the unpredictability of genius but also the human instinct toward love and trust.

Hysteria, Trauma and Melancholia Christina Wald, 2007-10-11 Hysteria, trauma and melancholia have not only become powerful tropes in modern-day culture at large; they are also prominent in the theatre. How do contemporary plays employ these concepts? How does the staging of these 'disorders' affect the aesthetics of the plays? What exchange relations between theory and theatre can be traced? Christina Wald pursues such questions in this new study, establishing the characteristics and concerns of 'The Drama of Hysteria', 'Trauma Drama' and 'The Drama of Melancholia' through in-depth readings of works by playwrights such as Anna Furse, Jerry Johnson, Sarah, Daniels, Phyllis Nagy, Claire Dowie, David Auburn, Marina Carr and Sarah Kane. Conceptualising hysteria, trauma and melancholia as 'performative maladies', Wald educes an exciting interaction of theatrical performance, psychiatric and psychoanalytic theory, and the theory of gender

performativity.
