**Annual Review of the Sociology of Religion. Volume 6 (2015)** ,2015-09-17 While the churches are emptying, other virtual religious places – as the religious websites – seem to be filling up. The researcher focusing on religion and internet or digital religion as an object of study must seek answers to a number of questions. Is computer-mediated religious communication a particular communication process whose object is what we conventionally call religion? Or is it a modern, independent form of religious expressiveness that finds its new-born status in the web and its particular language? To examine the questions above, and others, the book collects more empirical data, claiming that the Internet will have a specific or novel impact on how religious traditions are interpreted. The blurring of previous boundaries (offline/online, virtual/local, illegitimate/legitimate religion) is another theme common to all the contributions in this volume.

**Team Coaching: Artists at Work** Helena Dolny, 2012-09-27 No company has ever succeeded simply because it has brilliant individuals in its ranks - in fact many have failed because they have not succeeded in getting great talent to work together as a team. Every single South African business lives or dies by its ability to get its people to work together, in constantly changing teams, towards achieving the common goals of the company. *Team Coaching: Artists at Work* shows how the right coaching interventions can build skills in individuals so that they can become effective team players in a variety of work situations. The book is, not surprisingly, a team effort. A group of top South African coaches got together to share everything they had used individually when coaching teams. This pooling of best practice was so exciting, the outcome so much more than anticipated, that they decided to write this book together. This is not a DIY manual, nor is it a bible. Corporate teams are often temporary and shifting in nature with continuous restructuring, promotions, new people moving in, others resigning. Flexibility and creativity are critical. That's precisely where team coaching interventions come in, to increase individual self-awareness, enhance people's ability to adapt to the styles of others, and create cohesion and commitment of how to work together. That's when the real people power of an organisation starts to make itself felt, when talented individuals become effective team members. Coaches are artists, who bring their facilitation talents and tools to the team to make this happen. This is a book for business and team leaders who would like to turn a collection of outstanding individuals into an unbeatable team. Coaching is one of the fastest growing professions and this book contributes to wider understanding of what potential coaching offers not only for business teams but also for societal transformation.
