The World of Pompeii Pedar Foss, John J. Dobbins, 2009-06-02 This all embracing survey of Pompeii provides the most comprehensive survey of the region available. With contributions by well-known experts in the field, this book studies not only Pompeii, but also - for the first time - the buried surrounding cities of Campania. The World of Pompeii includes the latest understanding of the region, based on the up-to-date findings of recent archaeological work. Accompanied by a CD with the most detailed map of Pompeii so far, this book is instrumental in studying the city in the ancient world and is an excellent source book for students of this fascinating and tragic geographic region.

Pompeii Paul Zanker, 1998 Paul Zanker, a noted authority on Roman art and architecture shows us the images that marked Pompeii's development from country town to Roman imperial city. At home or in public, at work or at ease, Pompeians and their world come alive in Zanker's masterly rendering.

The Economy of Pompeii Miko Flohr, Andrew Wilson, 2017 This book is the first to address, from a variety of perspectives, the economy of the Roman city of Pompeii. It uses archaeological and textual evidence to discuss topics as diverse as agriculture in the fertile plains at the foot of mount Vesuvius, diet and health, manufacturing, urban investment, consumption, trade and money.

The Natural History of Pompeii Wilhelmina Feemster Jashemski, Frederick G. Meyer, 2002-09-19 The sudden destruction of Pompeii, Herculaneum and the surrounding Campanian countryside following the eruption of Vesuvius in AD 79 preserved the remarkable evidence that has made possible this reconstruction of the natural history of the local environment. Following the prototype of Pliny the Elder's Natural History, various aspects of the natural history of Pompeii are discussed and analyzed by a team of eminent scientists, many of whom have collaborated with Jashemski during her years of excavation of several gardens in the Vesuvian area. This volume brings together the work of geologists, soil specialists, paleobotanists, botanists, palaeontologists, biologists, chemists, dendrochronologists, ichthyologists, zoologists, ornithologists, mammalogists, herpetologists, entymologists, and archaeologists, affording a thorough picture of the landscape, flora, and fauna of the ancient sites. The detailed and rigorously scientific catalogues, which are copiously illustrated, provide a checklist of the flora and fauna upon which future generations of scholars can continue to build.

Principles of Decoration in the Roman World Annette Haug, M. Taylor Lauritsen, 2021-04-19 This book explores the manner in which architectural settings and action contexts influenced the perception of decoration in the Roman world. Crucial to the relationship between ancient viewers and media was the concept of decor, a term employed by Vitruvius and other Roman authors to describe the appropriateness of particular decorative elements to the environment in which they were located. The papers in this volume examine a diverse range of decorated spaces, from press rooms to synagogues, through the lens of decor. In doing so, they shed new light on the decorative principles employed across Roman Italy and beyond.
