Inglés técnico para Administración, Comercio e Informática (edición 2024) TESCHENDORFF COOPER, JULIA, 2024-08

Inglés técnico para Administración, Comercio e Informática is a textbook specifically tailored to the needs of students taking vocational training courses in Business Management, Commerce, and Information Technology (Ciclos Formativos de Admón. y Gestión, Comercio y Marketing, e Informática y Comunicaciones). Aligned with the syllabi of these courses, the book's content will equip students with the fundamental English language skills they need to navigate the working world. Practical grammar and vocabulary exercises, as well as other essential language learning activities —listening, reading, writing, and speaking—, will empower learners with the language proficiency needed to thrive in various personal and professional settings. Effective communication is crucial for professional development. Thus, special emphasis is placed on the development of skills such as verbal communication and teamwork. The written and spoken communication activities and projects are specially designed to prepare learners for both real work and real life situations. Students will develop their ability to collaborate with others while also learning how to use the Internet responsibly. The texts and listening tasks —inspired by an imaginary medium-sized company and its dynamic team of employees— will immerse pupils in a world of practical learning. As they follow the day-to-day activities and conversations of three relatable, young and diverse professionals, students will be motivated to achieve their goals and advance in their own professional careers. Materials: -- Fundamentals of A1-A2 English grammar. -- Numerous readings and texts on current topics and related to business management, IT, and commerce. -- Both broad and context-specific vocabulary. -- Listening and comprehension activities. -- Varied, useful oral and written communication tasks. -- Appendices with extra grammar and vocabulary. -- Additional projects pertaining to hard and soft professional skills. El solucionario de este libro es exclusivo para el profesorado que tenga el libro adoptado para la docencia. No está disponible para particulares.

The chapters in this book are organized into three parts, each focusing on different aspects of HE research. Part One covers protocols for diagnosing and monitoring HE in clinical practice. Part Two talks about various animal models and experimental techniques designed to investigate the pathogenesis of HE and evaluate potential treatments. Part Three looks at the underlying mechanisms and pathophysiological processes involved in HE, and presents advanced techniques and strategies for investigating the complex interactions that contribute to HE. In the Neuromethods series style, chapters include the kind of detail and key advice from the specialists needed to get successful results in your laboratory. Cutting-edge and authoritative, *Experimental and Clinical Methods in Hepatic Encephalopathy Research* provides researchers and clinicians with a comprehensive guide of both experimental and clinical methods, and the mechanisms underlying the complex condition of HE.
