The Economics of Mobile Telecommunications Harald Gruber, 2005-05-26 The mobile telecommunications industry is one of the most rapidly growing sectors around the world. This book offers a comprehensive economic analysis of the main determinants of growth in the industry. Harald Gruber demonstrates the importance of competitive entry and the setting of technological standards, both of which play a central role in their contribution to the fast diffusion of technology. This research-based survey will appeal to a wide range of applied industrial economists within universities, government and the industry itself.
